# Annual Report

## Metropolitan Transportation Commission 2007

Letter From the Executive Director .....	2
2007: Rising to the Challenge .....	5
MTC Allocations .....	28
Financial Highlights .....	30
Financial Report .....	33

### ABOUT THE COVER

Newspapers and TV news programs were filled with surrealistic scenes of a melted freeway overpass in the aftermath of a fiery tanker-truck accident in the early hours of Sunday, April 29, 2007. Not just any overpass, but a key connector in the region's busiest interchange, the MacArthur Maze in Oakland. Rising to the challenge, the Metropolitan Transportation Commission teamed with Caltrans to mount an all-out effort to quickly repair the damage and ward off gridlock.

# Letter

FROM THE EXECUTIVE DIRECTOR

## Vision x 2: Region and Nation Chart Transportation Futures

As captured vividly in the images that illustrate this report, 2007 was a dramatic – and highly photogenic – year for Bay Area transportation. It was a year of long-awaited projects completed and inaugurated, of critical construction deadlines met and exceeded, of congestion-easing innovations implemented, and of services initiated and expanded. It also was a year of deep thinking and strategizing, as MTC, with help from the Association of Bay Area Governments and others, launched a major

initiative to outline a new long-range transportation vision for the region. The still-evolving *Transportation 2035 Plan* (see

page 20) looks 25 years into the future, and aims to chart a path toward a sustainable Bay Area in the face of projected growth and global warming impacts.

Meanwhile, as we in the Bay Area do our best to look a quarter-century ahead, a special 12-member federal panel has just completed work on a study with a 50-year time horizon. The group, the National Surface Transportation Policy and Revenue Study Commission, has published its findings in a comprehensive and far-reaching report that calls for bold changes in federal transportation policies, programs and institutions. The work of this small body with the big name is familiar

to me, because I am one of its members. Our report, *Transportation for Tomorrow*, was presented to Congress at a hearing before the House Transportation and Infrastructure Committee in January 2008.

## Needed: A Post-Interstate Vision

Congress established the National Commission in 2005 with passage of the Safe, Accountable, Flexible, Efficient Transportation Equity Act – A Legacy for Users (SAFETEA, for short). As I mentioned in last year's annual report, in 2006 I was privileged to be appointed to this panel by House Speaker Nancy Pelosi. The National Commission is chaired by U.S. Secretary of Transportation Mary Peters, and its bipartisan membership represents federal, state and local governments, transportation-related industries, and public interest organizations.

Why was the commission needed? Congress believed that for too long – since substantial completion of the Interstate Highway System in the late 1980s – this country has lacked a clear, comprehensive, well-articulated and widely understood strategic vision to guide transportation policymaking. The job of our panel was to try to bridge this “vision gap” and formulate recommendations for the successor legislation to SAFETEA.

We worked diligently during 2007 to fulfill this charge, meeting and holding public hearings across the country as part of an intensive 20-month study period. As befits a transportation panel, we covered a lot of ground, not only literally but conceptually and philosophically as well. It was an extraordinarily stimulating and productive assignment, and I hope the ideas we put forward will kindle a lively policy debate in the months leading up to congressional enactment of a new federal transportation program in 2009.

## A Transportation System at Risk

Regrettably, we found that conditions on America's surface transportation systems – our roads, bridges and highways, our passenger and freight rail facilities, our public transit networks – are deteriorating. In some cases, the physical infrastructure itself is showing the signs of age. In almost all cases, the operational efficiency of our key transportation assets is slipping.

Extrapolating from today's difficulties and taking into account other trends, our study group also identified future issues. Among the most significant are the challenges posed by population growth, the globalization of trade, the need to preserve and protect our environment, and, not least, the sheer magnitude of the costs involved to address each of these problem areas and to upgrade our existing transportation network to a good state of repair and build the more advanced facilities we will require to remain competitive.

## Rewriting “The Three Rs”

Calling for a “new beginning” for the nation's transportation efforts, *Transportation for Tomorrow* envisions refocusing federal transportation programs while maintaining a strong federal role in surface transportation. Our recommendations can be grouped into three Rs:

- **reforming** how the nation upgrades and expands its transportation network, from how we pick projects to how we build them
- **restructuring** the federal transportation investment program to concentrate on areas of genuine national interest
- generating new **revenue** – in part, by increasing the federal gas tax and eventually by instituting congestion pricing and other user fees – to close the investment gap.

The three Rs are designed to work together to promote a stronger economy, faster commutes and cleaner air, and to save lives.

## “Let's Get Moving”

*Transportation for Tomorrow* presents a case for fundamental reform at the national level

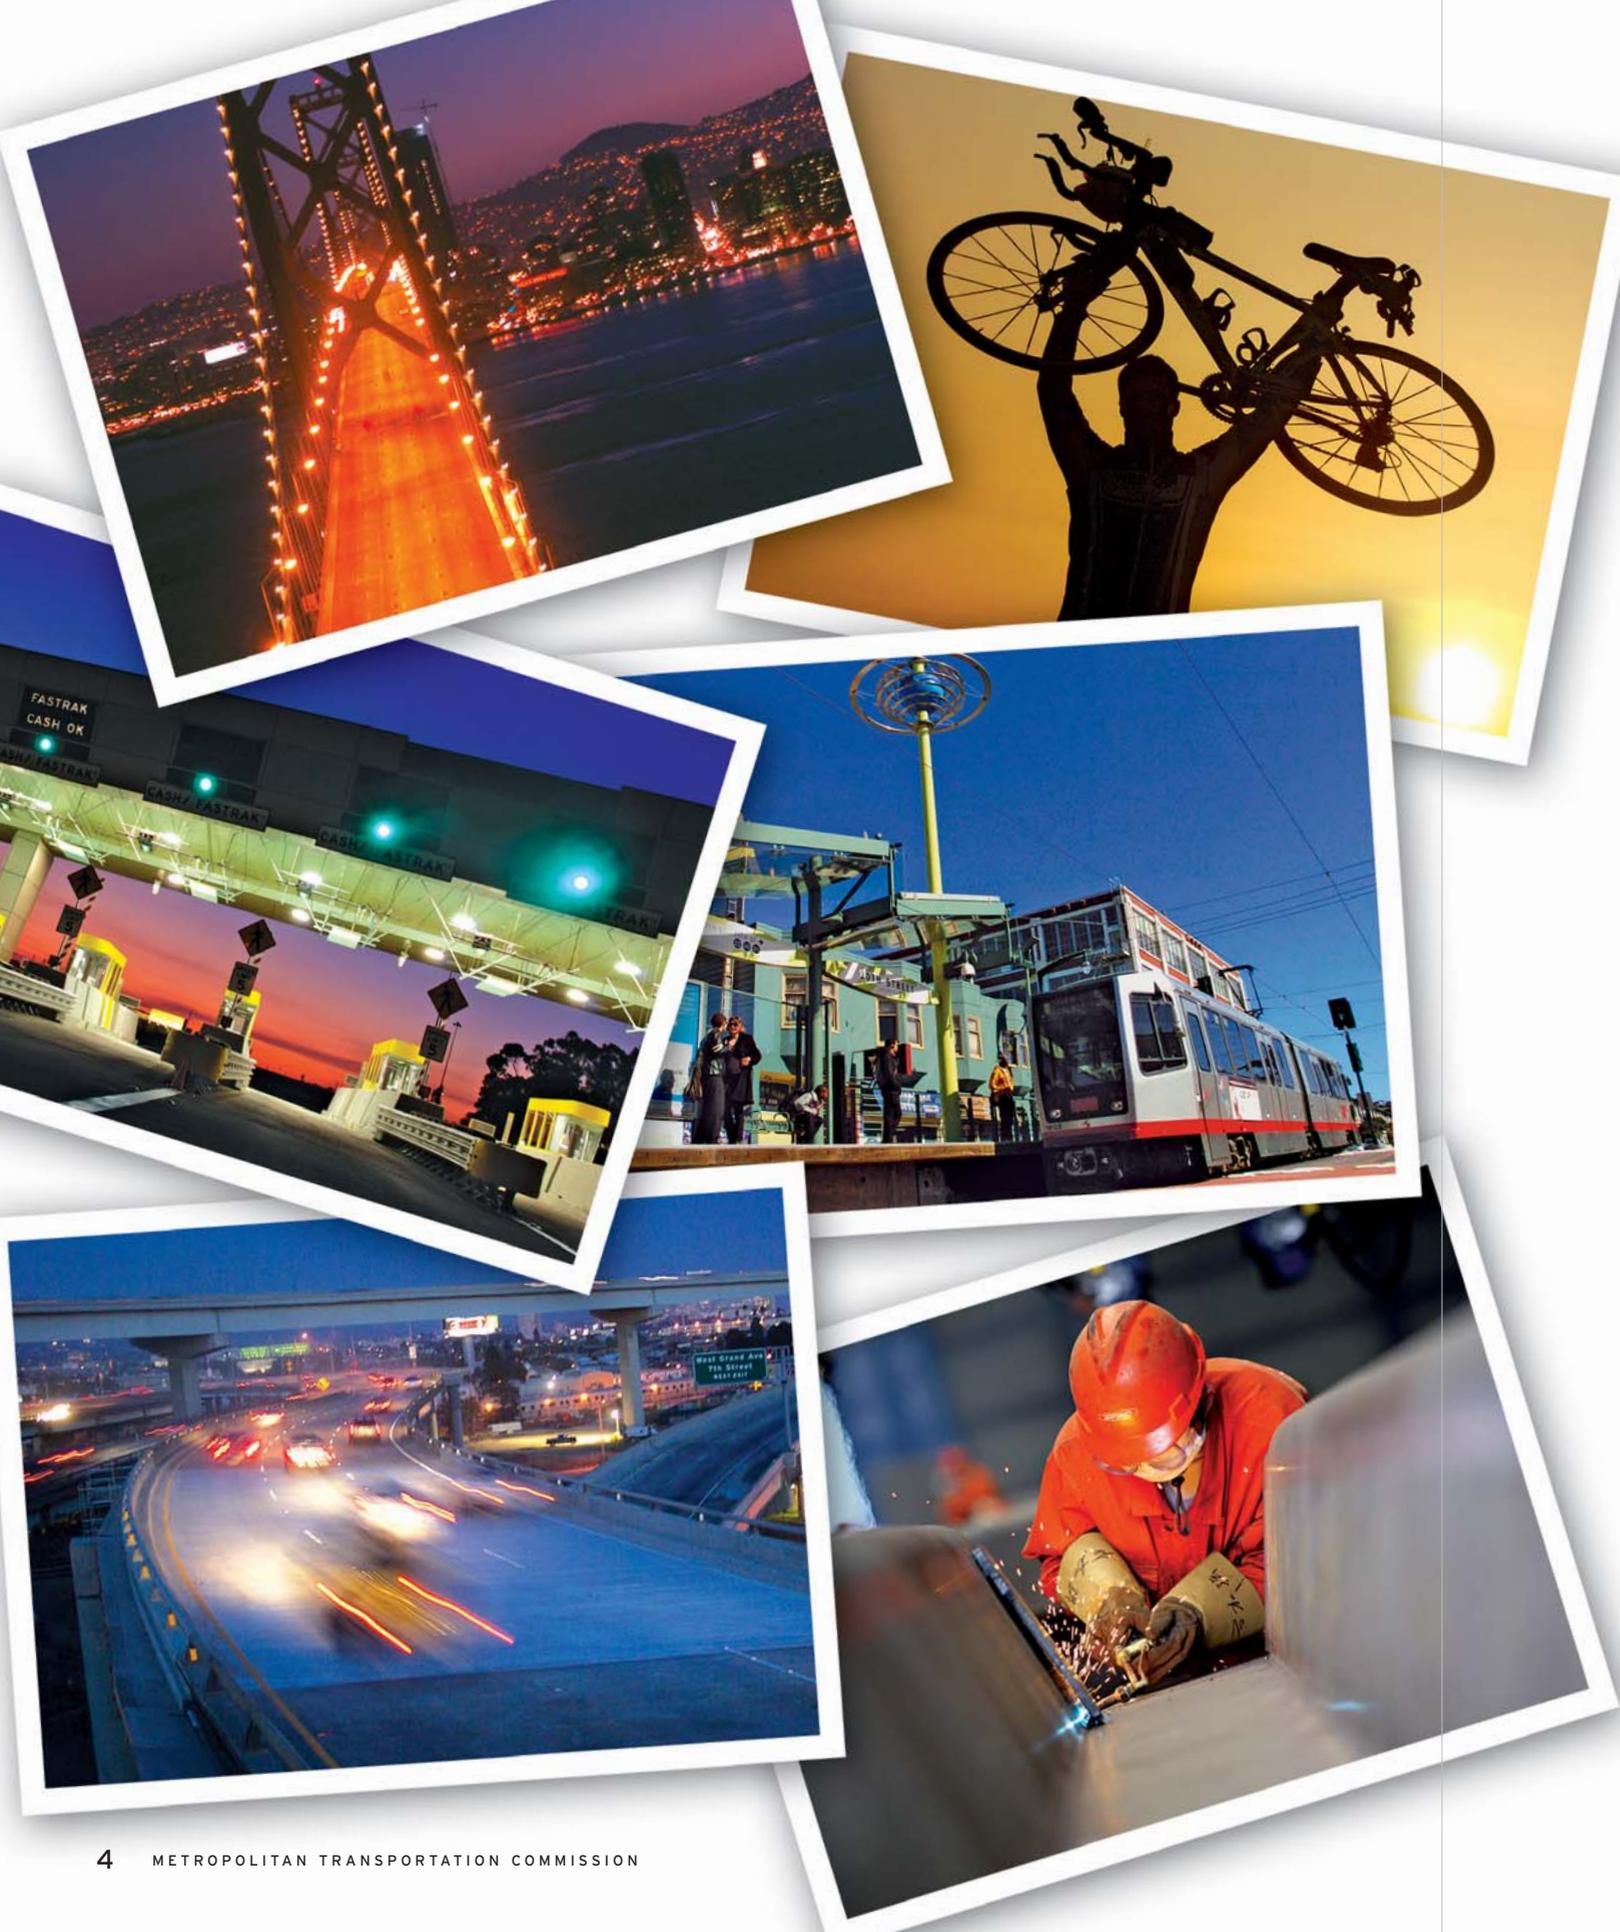

that I and my fellow panel members believe is compelling, and that we hope is persuasive. The report is an action plan with one goal in mind – to create and sustain the preeminent surface transportation system in the world. As we in the Bay Area move forward to flesh out our own Transportation 2035 vision, let us aspire to this same high goal, and let us resolve as a region to take the actions necessary to attain it. At both the national and regional levels, the message is the same: “Let's get moving!”

Steve Heminger, *Executive Director*

# Rising to the Challenge

## AN EVENTFUL YEAR FOR BAY AREA TRANSPORTATION

**2007** was a year of challenges met and mastered, and of miracles and milestones large and small for the Metropolitan Transportation Commission (MTC) and its counterpart, the Bay Area Toll Authority (BATA). When a fiery tanker-truck accident literally melted a key section of the busy **MacArthur Maze** connector to the San Francisco-Oakland Bay Bridge, MTC immediately stepped in to help organize and publicize commute alternatives while Caltrans rushed to reconstruct the downed overpass and clear the debris – averting a traffic nightmare. Likewise, the shutdown of the **Bay Bridge** over Labor Day weekend to replace a massive deck piece went without a hitch, thanks to meticulous planning and an intense publicity campaign on the part of BATA and Caltrans. ■ To these two minor miracles BATA and MTC added several major milestones. The sleek new **Benicia-Martinez Bridge**, which opened in August, is testimony to BATA's financing acumen and perseverance with a difficult project. BATA also is playing a central role in the construction of the Bay Bridge's monumental new **East Span**, which reached the symbolic halfway mark in December when the Skyway portion was declared substantially complete. The 2007 surge in the number of motorists who pay their tolls electronically with **FasTrak**<sup>®</sup> was a direct response to BATA's aggressive marketing campaign and innovative improvements to the toll plazas and approaches. ■ MTC's investment in regional transit blossomed in San Francisco, where the long-awaited **Muni T-Third Rail** line opened for service in April 2007. With coordination and funding assistance from MTC, the 2007 **Bike to Work Day** marked the largest turnout in its history, while back-to-back **Spare the Air/Free Transit** days drew 665,000 additional bus, train and ferry riders over the two-day smog advisory. And the official introduction of the **TransLink**<sup>®</sup> "smart" fare card to Golden Gate Transit/Ferry and AC Transit riders in the fall of 2007 marked a victory for MTC's long-term efforts to develop a universal fare payment system for the region's two dozen-plus transit systems. ■ We tell the story of the mega projects and headline-grabbing events of 2007 largely in photos. If a picture is worth a thousand words, then this report speaks volumes about the vital roles played by MTC and BATA in keeping the Bay Area moving.

# Maze Meltdown

CRASH INFERNO DESTROYS AREA'S BUSIEST INTERCHANGE

Eye-popping images confronted Bay Area residents in the aftermath of a gasoline tanker-truck accident and fire on the East Bay's MacArthur Maze – the busiest freeway interchange in the region – on Sunday, April 29. The early morning crash totally demolished the upper-level freeway connector, causing steel and concrete to literally melt onto the lower level. The damage to these critical routes, used by some 80,000 vehicles a day going to and from the San Francisco-Oakland Bay Bridge as well as points north, south and east, raised the specter of commute traffic mayhem. MTC, Caltrans and Bay Area transit operators instantly mobilized an intensive emergency response, including beefed-up transit service and – on the first Monday after the disaster – free rides across all Bay Area bus, rail and ferry systems. To keep the transit momentum going, MTC launched an information blitz to publicize commute alternatives through its 511.org traveler information Web site and phone line. The measures and a cooperative attitude on the part of commuters combined to keep gridlock at bay for the duration of the crisis.

# Maze Miracle

TOILING DAY AND NIGHT TO REPAIR AND REBUILD

All hands were immediately on deck to repair and reconstruct the "Maze," the vital, multilevel connection to three interstate highways that was severely damaged in a single gasoline tanker accident in April 2007. Construction crews worked day and night on the job, expedited by the governor's three-county, state-of-emergency declaration that allowed state and federal funds to flow for repairs and traffic mitigation. With astonishing alacrity, Caltrans repaired and reopened the Interstate 80/I-880 connector a mere week after the accident. And even more "a-mazing," C.C. Myers, Inc. completed the herculean task of rebuilding the collapsed I-80/I-580 connector just 25 days after the accident, more than a month ahead of schedule and in time for the busy Memorial Day weekend.

# Smooth Move

## BAY BRIDGE LABOR DAY CLOSURE

As the Bay Area celebrated 2007's Labor Day weekend, a massive, tightly timed operation was under way on the eastern half of the San Francisco-Oakland Bay Bridge. Crews worked nonstop around the clock to demolish and remove a football-field-sized chunk of the existing upper deck just east of the Yerba Buena Island Tunnel, replacing it with a seismically upgraded 6,500-ton rebar-and-concrete slab that was rolled smoothly into place. With the entire bridge closed to traffic for the three-day holiday, MTC's Bay Area Toll Authority, Caltrans and the California Transportation Commission joined forces to avert highway gridlock by subsidizing expanded public transit service and mounting a statewide public information campaign. On Labor Day afternoon came the astonishing announcement that the bridge would open 11 hours ahead of schedule.

# Building an Icon

EAST SPAN SKYWAY COMPLETE

It may look unfinished, with long arms stopping midair over the Bay, but the Skyway is actually a finished piece of the complex puzzle that will become the new San Francisco-Oakland Bay Bridge East Span. Substantially complete as of December 2007, the 1.2-mile viaduct stretching across Bay mudflats is ready to join seamlessly with the new self-anchored suspension (SAS) span now under construction. The Skyway's graceful, curved design belies its structural muscle and advanced seismic safety. The parallel road decks consist of the world's largest precast concrete segments, supported by enormous foundations with steel piles driven deep into the floor of the Bay. Capping the twin concrete decks are massive, 1,700-ton box girders made of steel, the better to connect with the steel decks of the SAS.

# Forging Ahead

## EAST SPAN'S CROWNING JEWEL TAKES SHAPE

As construction crews filled in the gaps and put finishing touches on the Skyway portion of the new Bay Bridge East Span over the last year, attention turned to the marquee element: the self-anchored suspension span, with its soaring, 525-foot tower and graceful network of cables. Crews toiled underneath and above the swirling waters of the Bay to construct and pour the massive rebar-and-concrete foundations for the main tower as well as for secondary supports to the east, substantially completing the job by the end of December. Meanwhile, half a world away at a Shanghai steel facility, skilled workers fabricated prototypes for the tower's tapered legs and began the precision job of welding together steel plates to form deck sections for the suspension span.

# Expansive Span

NEW BENICIA-MARTINEZ BRIDGE  
HONORS CONGRESSMAN GEORGE MILLER

The Bay Area's necklace of bridges gained a handsome new link when the second span of the Benicia-Martinez Bridge opened in August 2007. The span's clean, curved lines give no hint of the project's engineering breakthroughs – from the development of new techniques to cure lightweight concrete to the bubble curtain that protected migratory fish from pile-driving shock waves. Officially named the Congressman George Miller Bridge, the 1.2-mile viaduct carries five lanes of northbound Interstate 680 traffic, while the original span now carries southbound traffic (with a bicycle/pedestrian path to come soon). The net result is a major increase in capacity across the Carquinez Strait. The \$1.2 billion project – with financing and construction overseen by MTC's Bay Area Toll Authority – includes a new freeway interchange in Benicia, reconstruction of an interchange in Martinez and a striking new toll plaza that is as high-tech as it looks.

# Rail Arrival

NEW T-THIRD LINE DELIVERS PASSENGERS AND PROSPERITY

San Francisco Muni's newest Metro line – the long-awaited T-Third – rolled into operation in April 2007. With 5.1 miles of track and 18 stations along the Third Street corridor, the project is the largest light-rail expansion in recent Muni history. The sleek silver-and-red trains are anticipated to deliver more than just passengers, bringing renewed economic vitality to some of San Francisco's most underserved neighborhoods. Funds for the \$648 million project came from a combination of sources, including moneys programmed or allocated by MTC from state and federal sources and Regional Measure 2 bridge tolls. MTC is now advocating for federal New Starts funding for Phase 2, known as the Central Subway project, which will extend the line north to Union Square and Chinatown.

# Climate for Change

CONFERENCE FACES GLOBAL WARMING

A historic moment occurred in the fall of 2007 when the leaders of MTC and the Association of Bay Area Governments officially joined forces to develop the next long-range plan that will guide Bay Area transportation, growth and land-use decisions in coming years. The October kick-off conference, which took place in Oakland and drew a full house of 700, focused on the two agencies' mutual determination to confront the challenges of climate change, primarily through more sustainable regional growth patterns and substantial reduction of carbon dioxide emissions from vehicles by 2035. San Francisco Mayor Gavin Newsom inspired the crowd with his lunch-time talk on the steps his city is taking to help lead the way toward a greener future. Key messages that emerged from the conference as well as from a series of polls, focus groups and other outreach will lead to adoption of a *Transportation 2035 Plan* in 2009.

TRANSPORTATION  
**2035**  
 CHANGE IN MOTION

# Transit Villages

TRANSIT-ORIENTED DEVELOPMENT SEEDS BEAR FRUIT

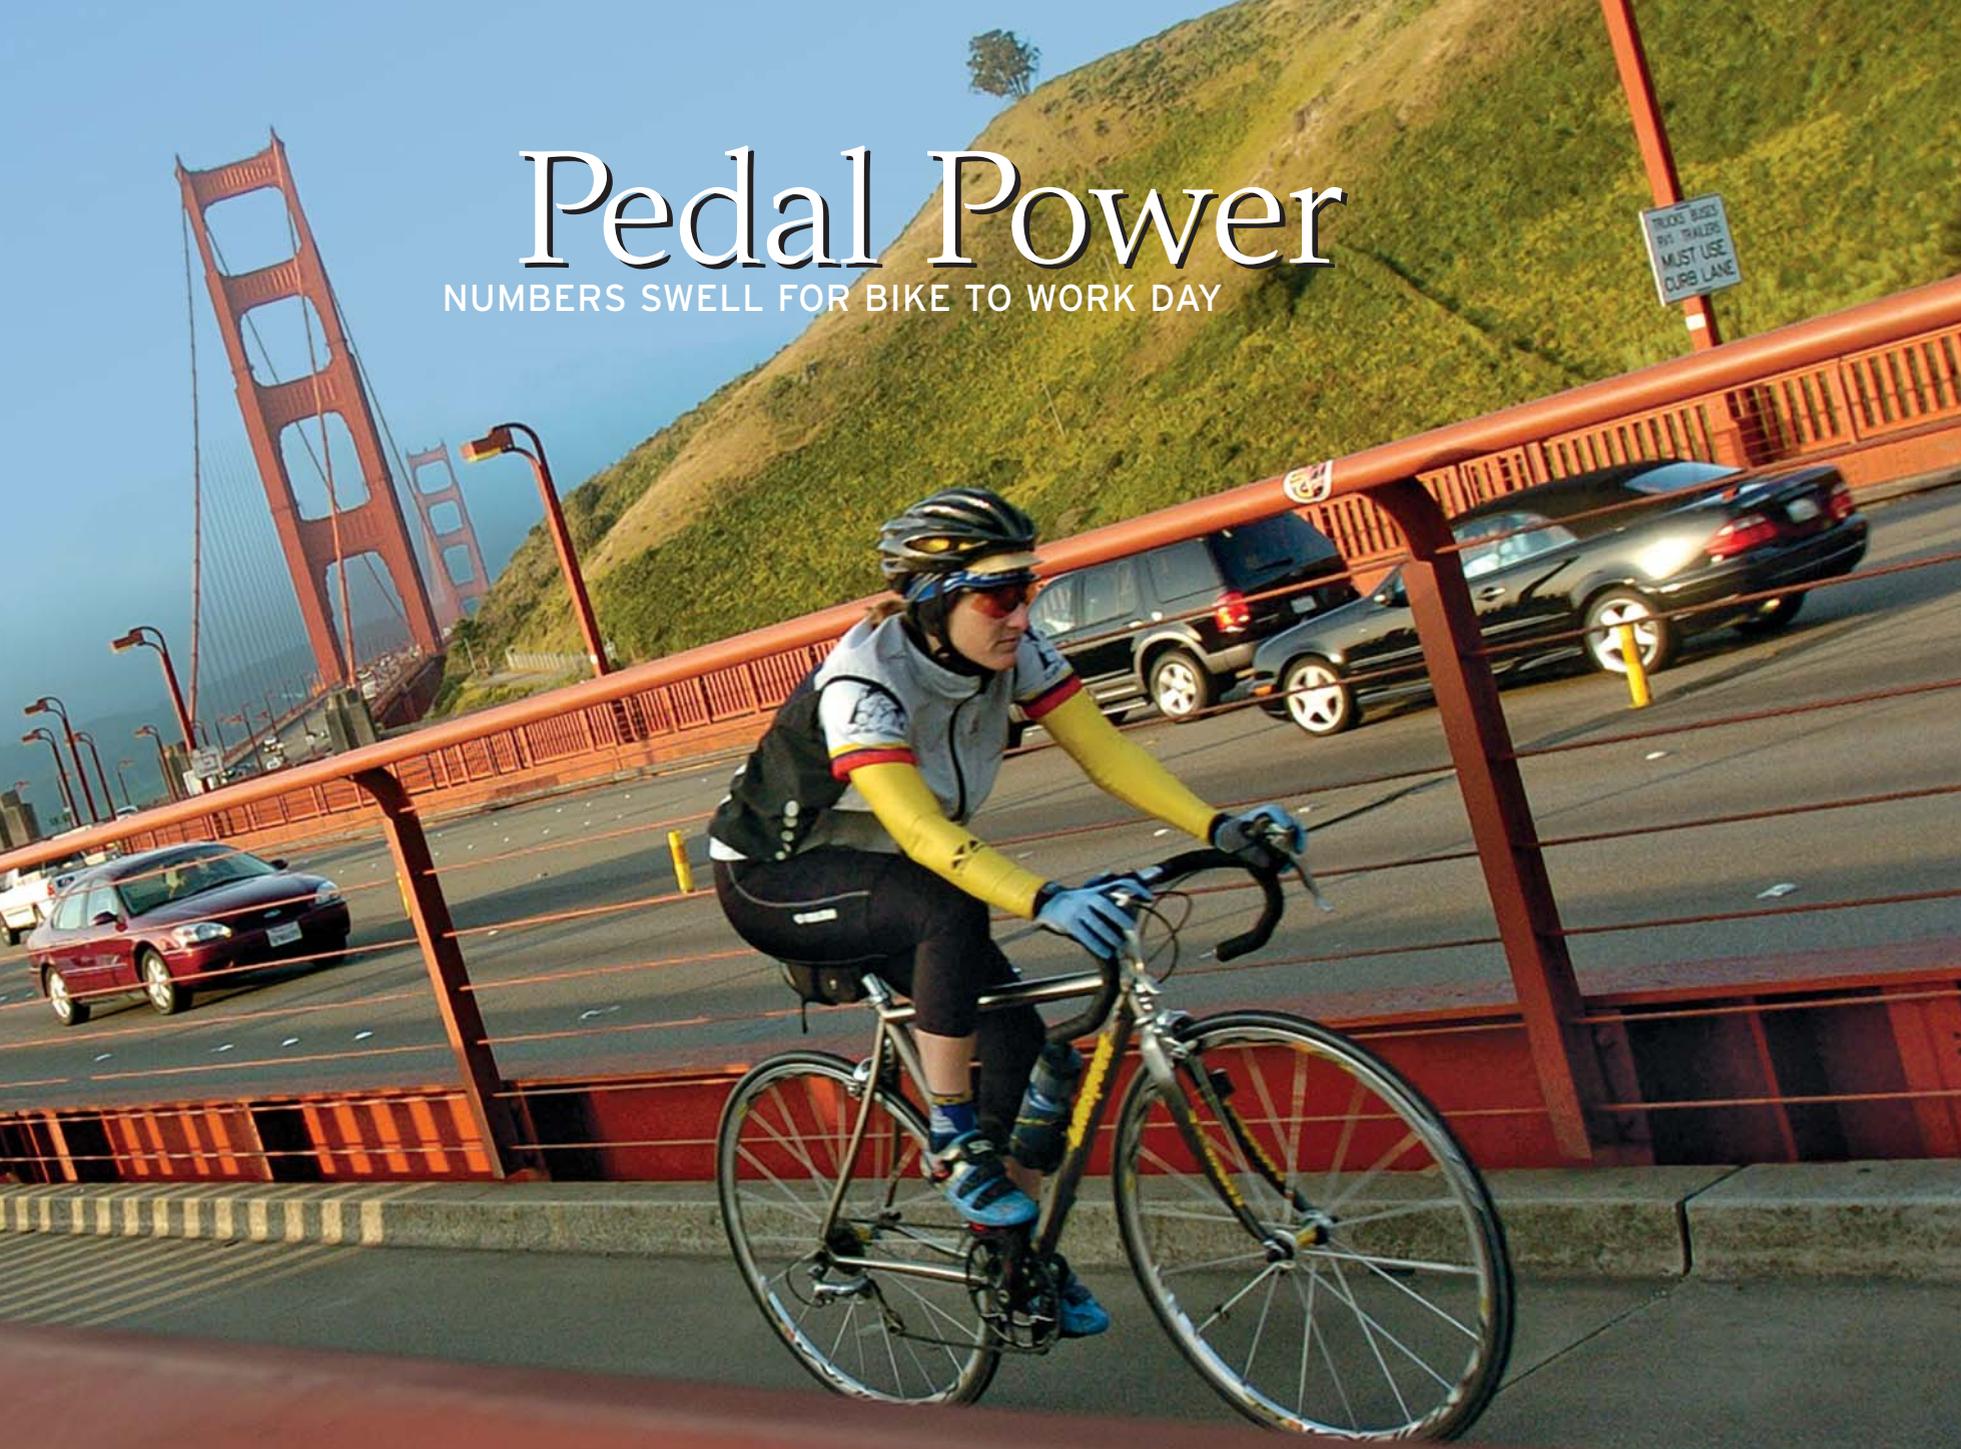

MTC's transit-oriented development (TOD) initiative is reaping results, as local Bay Area jurisdictions focus on intensifying development around bus, rail and ferry hubs to promote greater transit use and provide more housing. In fall 2007, two grand openings and a groundbreaking heralded TOD projects supported with MTC grants. Downtown Richmond's \$6.4 million refurbished bus and train station opened, creating the centerpiece of a 16-acre transit village. In Oakland, the Uptown Transit Center – a bus mall with attractive, canopied shelters next to a BART station – opened, providing convenient, multimodal transit access to a major new housing and retail project. And Union City broke ground on an intermodal station that will connect BART and buses with intercity rail service and that will anchor a new transit-oriented, multiuse district with more than 1,500 housing units.

# Pedal Power

NUMBERS SWELL FOR BIKE TO WORK DAY

Bike to Work Day reached a milestone in May 2007 when participation topped 100,000 cyclists for the first time since MTC began to underwrite the annual campaign in 1994. Thousands of volunteers assisted the Bay Area Bicycle Coalition, which coordinated the regionwide effort, by staffing 190 morning "energizer stations" where cyclists were offered free food and liquids, tote bags, and plenty of encouragement. In addition, a record number of 237 teams took part in the month-long Team Bike Challenge, in which bicyclists earned points for their team each time they biked for nonrecreational purposes.

## Free Ride

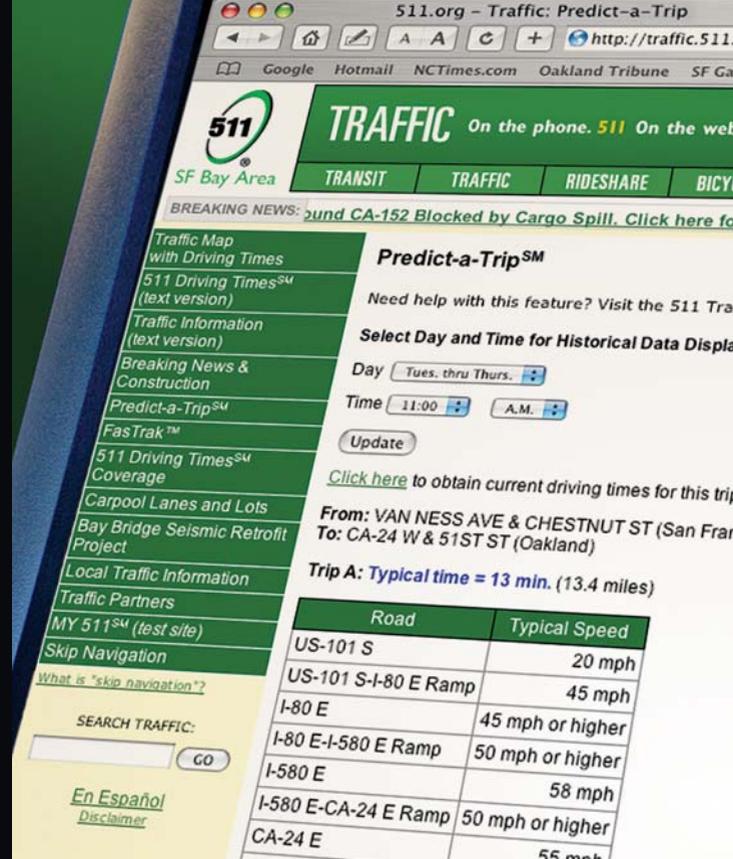

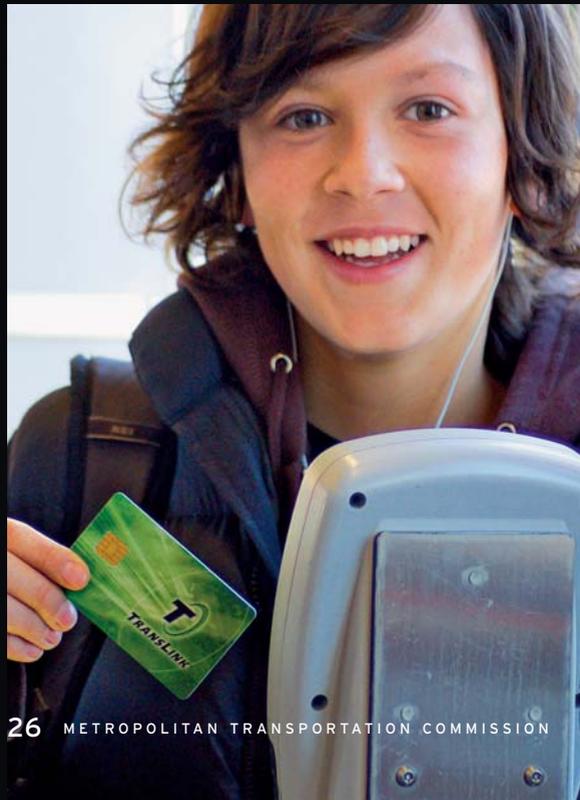

"NO FARE!  
THANKS FOR SPARING THE AIR!"

The Bay Area's fourth annual Spare the Air/Free Transit Program was the most successful yet, with a record 29 transit systems from all nine counties providing free commutes on two designated Spare the Air weekdays in August 2007. Over the two back-to-back days, transit ridership increased a total of 22 percent, and nearly 100,000 vehicle trips were eliminated due to drivers shifting to transit. The result: Smog precursors and other pollutants were reduced by 60 tons, and the region met its goal of avoiding a violation of the national eight-hour ozone standard on the two designated days. MTC and the Bay Area Air Quality Management District provided \$8.5 million for Spare the Air/Free Transit in 2007.

# Smart Card

## TRANSLINK® GOES PRIME TIME

Since its official public debut in September 2007 on all AC Transit and Dumbarton Express buses and Golden Gate Transit and Ferry routes, the TransLink® transit-fare card has quickly become the way to pay for riders on these transit systems. By year-end, usage of the reloadable smart card had climbed to 11,000 transactions a day. In addition to enhancing rider convenience and speeding up boarding, TransLink® has been offering patrons savings with introductory fare discounts by AC Transit and permanent discounts by Golden Gate Transit and Ferry. MTC began testing TransLink® in 2002, and is set to go regional with electronic fare payment starting in 2008, when BART, San Francisco Muni and Caltrain begin accepting the card on all routes. SamTrans and the Santa Clara Valley Transportation Authority are slated to follow in 2009.

## Instant Hit

511 ADDS PREDICT-A-TRIP<sup>SM</sup> SERVICE

Can you tell the future by looking at the past? In the case of Predict-a-Trip<sup>SM</sup>, the answer is a definite "yes." MTC's award-winning 511 traveler information service added a new Web-based feature in February 2007 that provides drivers with an estimate of how long a given trip will take, based on historical data. Predict-a-Trip<sup>SM</sup> builds on the popular 511 Driving Times<sup>SM</sup> service, which calculates how long it will take to get from point A to point B given current, real-time traffic conditions and incidents. With the new service, Web users select a route on the interactive 511 traffic map and Predict-a-Trip<sup>SM</sup> calculates the typical speed and driving time for the day of the week and hour specified. The new feature helped to propel 511 usage to record levels in 2007: Average monthly Web visits topped 2 million, while monthly call levels exceeded 450,000.

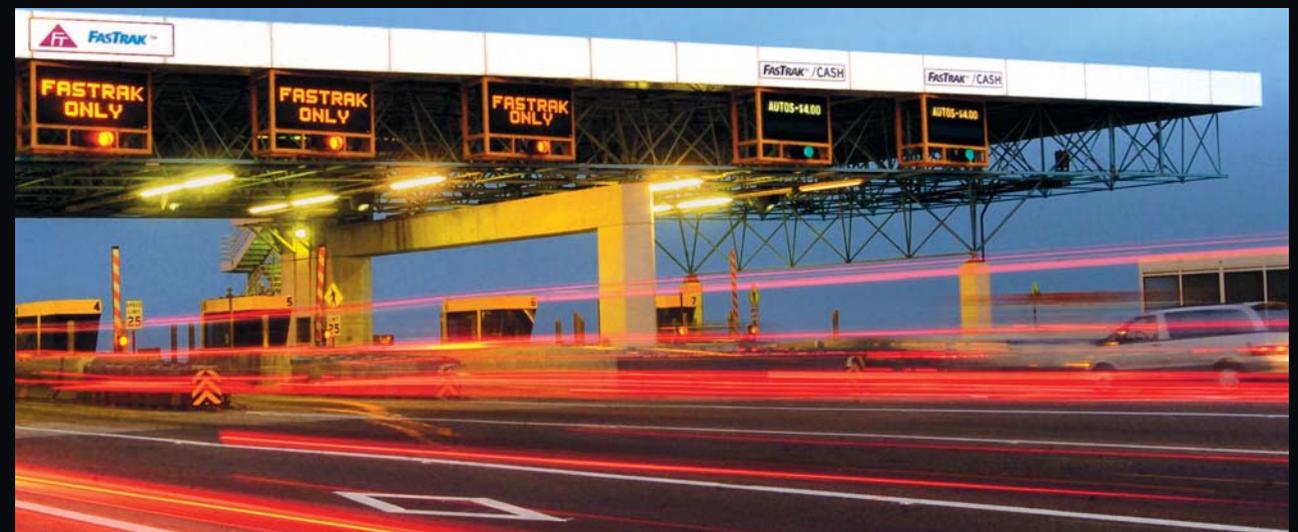

# Breezing Through

## FASTRAK® TAKES ELECTRONIC TOLLING TO THE NEXT LEVEL

Nasty afternoon back-ups at the toll plaza at the Interstate 680 crossing over the Carquinez Strait have evaporated ever since "open-road tolling" was introduced in conjunction with the unveiling of the second Benicia-Martinez span in August 2007. Equipment capable of reading FasTrak® electronic toll tags while cars are passing through at highway speeds was incorporated into the bridge's futuristic-looking toll plaza, and ecstatic commuters have never looked back. The innovations at the Benicia-Martinez crossing are part of a series of upgrades to the FasTrak® system engineered

in the summer of 2007 by Caltrans and MTC's Bay Area Toll Authority, including conversion of more lanes at the region's state-owned bridges to FasTrak®-only status, extension of FasTrak®-only lanes to give toll-tag users the edge, and better signage to separate cash and electronic payers farther upstream from the toll plazas. The changes at the seven state toll bridges, along with an aggressive marketing and incentive campaign for new FasTrak® customers, helped to push the number of FasTrak® accounts to 727,000 by the end of 2007, a 27 percent increase over the prior year.

(a) Revenues from a half-cent sales tax collected in Alameda, Contra Costa and San Francisco counties.

(b) Includes Regional Measure 1 Rail Extension funds, Regional Measure 2 funds, AB 664 Net Toll Revenue funds, 5% Unrestricted State Fund Reserves and 2% Bridge Revenue Reserves.

(c) SamTrans claims these funds on behalf of the Caltrain/Joint Powers Board.

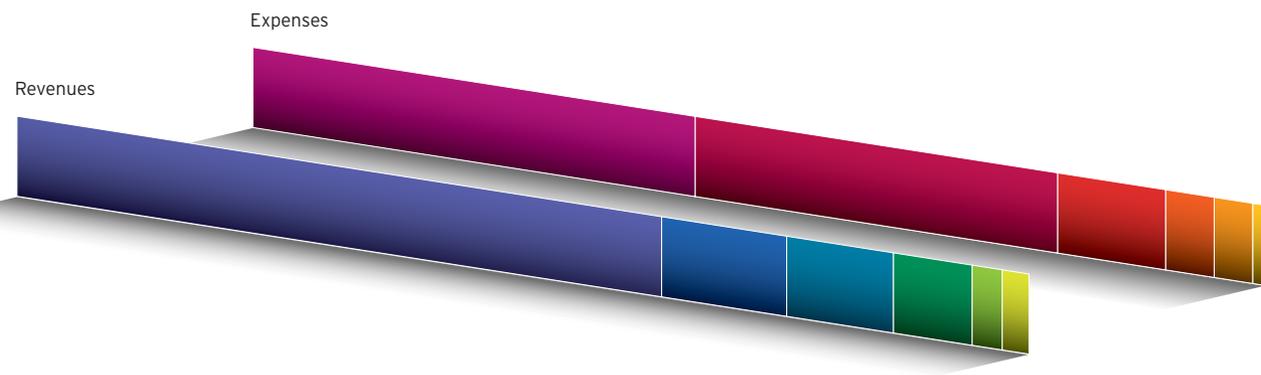

(d) Includes funding for cities, counties and local transportation agencies not listed separately above.

(e) Bridge-toll-funded pedestrian and bicycle allocations.

# MTC

## Financial Highlights Metropolitan Transportation Commission fiscal year 2006-07

Created by the state Legislature in 1970 to map the transportation future of the nine-county San Francisco Bay Area, MTC today continues its planning role while also investing in and ensuring the smooth operation of the region's public transit, highway and local roadway systems. MTC also functions as the Bay Area Toll Authority and the Service Authority for Freeways and Expressways.

### REVENUES

State Grants	\$ 227,808,567
Federal Grants	44,210,716
Project Grants From Local Agencies	37,665,623
Transfers From Other Funds	27,851,702
Sales Taxes	10,626,162
Investment Income	9,498,532

**Total Revenues** **\$357,661,302**

### EXPENSES

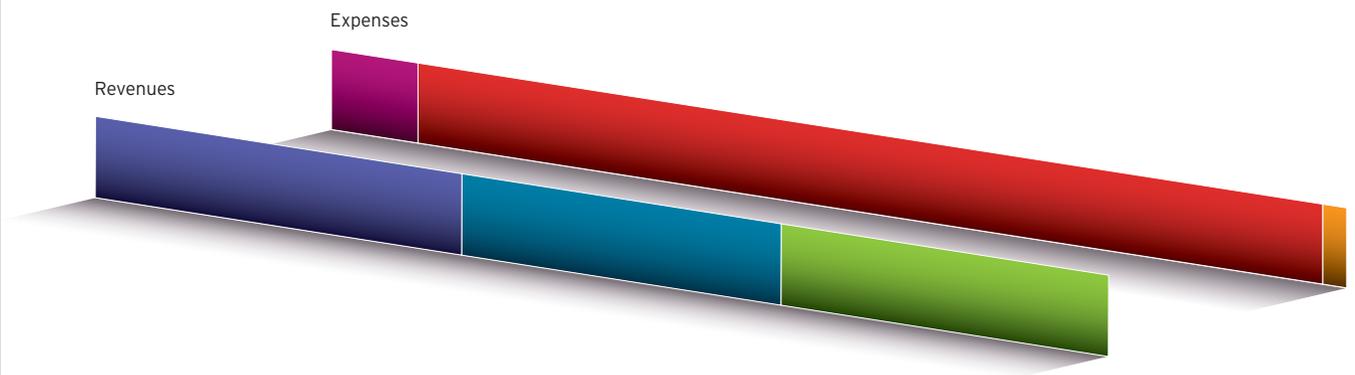

Allocations (by Fund Source):	
State Transit Assistance	\$128,864,904
Other Governmental Funds	18,551,250
AB 664 Net Toll Revenue Reserves	8,818,893
Net Change in Fund Balances	128,103,925
Professional Fees	38,188,562
Salaries and Benefits	17,165,727
Capital Projects	13,608,205
Other Expenditures	4,359,836

**Total Expenses** **\$357,661,302**

# BATA

## Financial Highlights Bay Area Toll Authority fiscal year 2006-07

BATA administers toll revenues from the region's seven state-owned toll bridges – the Antioch, Benicia-Martinez, Carquinez, Dumbarton, Richmond-San Rafael, San Francisco-Oakland Bay and San Mateo-Hayward bridges. BATA also finances capital and safety (including seismic retrofit) improvements to the bridges, primarily through the issuance of bonds. The FasTrak® electronic toll collection system (used also on the independently managed Golden Gate Bridge) is another BATA responsibility.

### REVENUES

Operating Revenues:	
Toll Revenue Receipts	\$ 422,354,852
Other Revenues	5,988,978
Non-Operating Revenues:	
Caltrans/Other Agency Grants	275,590,146
Investment Income	96,415,260
Contributions From Caltrans	1,234,760
Change in Net Assets	382,848,657

**Total Revenues** **\$1,184,432,653**

### EXPENSES

Operating Expenses:	
Professional Fees	\$ 33,228,254
State of California, Caltrans	29,575,582
Allocations to Other Agencies	24,268,599
Depreciation/Other	8,901,589
Salaries and Benefits	4,952,859
Non-Operating Expenses:	
State of California, Caltrans	784,066,195
Interest Expense	131,438,684
Other Agencies	123,418,931
Contributions to BAIFA*	15,000,000
Bond Issuance Costs	1,065,694
Transfers to:	
MTC	26,516,266
SAFE	2,000,000

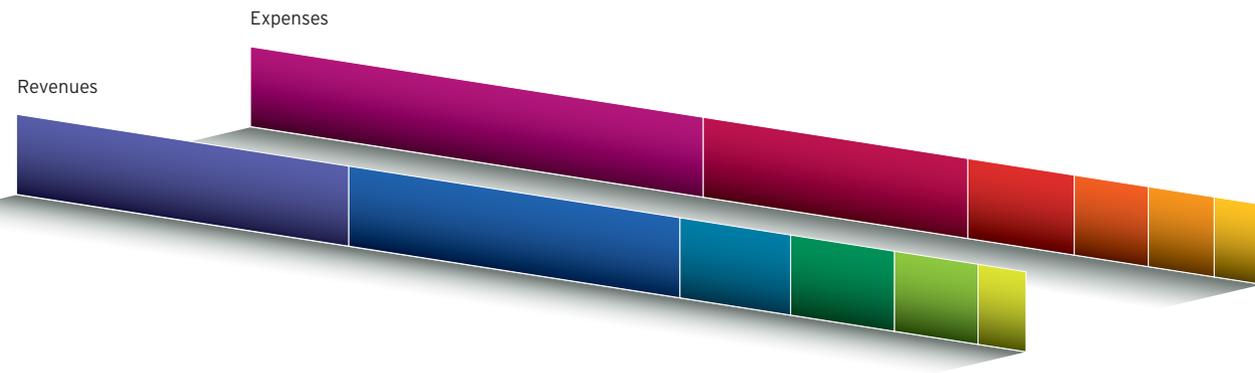

**Total Expenses** **\$1,184,432,653**

\*Bay Area Infrastructure Financing Authority

# SAFE

## Financial Highlights Service Authority for Freeways & Expressways fiscal year 2006-07

SAFE oversees the operations and finances of the Bay Area's publicly sponsored motorist aid services – the roving tow trucks of the Freeway Service Patrol and the regional highway/expressway call box program. SAFE is funded by a \$1 per year fee on motor vehicles registered in the nine Bay Area counties.

### REVENUES

DMV Registration Fees	\$ 5,997,648
Caltrans and Other Agency Grants	5,979,971
Transfer From BATA	2,000,000
Change in Net Assets	1,873,336

**Report of Independent Auditors**

To the Commissioners of the  
Metropolitan Transportation Commission:

In our opinion, the financial statements of the governmental activities, the business-type activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the Metropolitan Transportation Commission (MTC) which collectively comprise MTC's basic financial statements as listed in the table of contents, present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of MTC at June 30, 2007 and 2006, and the respective changes in financial position and cash flows, where applicable, thereof for the years then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of MTC's management. Our responsibility is to express opinions on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinions.

As described in Note 1C, during the year ending June 30, 2007 MTC adopted the provisions of the Governmental Accounting Standards Board (GASB) Statement No. 45, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions* and the provisions for GASB Statement No. 48, *Sales and Pledges of Receivables and Future Revenues and Intra-Entity Transfers of Assets and Future Revenues*.

The accompanying management's discussion and analysis appearing on pages 2 through 15 and the budgetary comparison and funding status information identified in the table of contents under *Required Supplementary Information* and appearing on pages 76 through 79 of this report are not a required part of the basic financial statements but are supplementary information required by the accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audits were conducted for the purpose of forming opinions on the financial statements that collectively comprise MTC's basic financial statements. The supplementary schedules identified in the table of contents under *Other Supplementary Information* and appearing on pages 81 through 100 of this report are presented for purposes of additional analysis and are not a required part of the basic financial statements. These supplementary schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The charts, schedules and other information identified in the table of contents under *Statistical Section* and appearing on pages 102-117 of this report, have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

# **Metropolitan Transportation Commission**

## **Financial Statements for the years ended June 30, 2007 and 2006**

### **Management's Discussion and Analysis (unaudited)**

---

#### **Management's Discussion and Analysis**

This section presents an overview of the financial activities of the Metropolitan Transportation Commission (MTC), and its blended and discretely presented component units for the years ended June 30, 2007 and 2006.

Fiscal year 2007 was a busy year for MTC. A number of programs were started which should bear fruit next fiscal year. MTC's general fund recorded a healthy operating surplus, and the MTC Service Authority for Freeways and Expressways (SAFE) and the Bay Area Toll Authority (BATA) also showed operating surpluses as well. The Bay Area economy improved, with the region's sales tax revenue showing a small increase from the previous year.

Following are some highlights of fiscal year 2007:

- The 511 program supported the MacArthur Maze emergency response.
- Work is on schedule for the opening of the new Benicia-Martinez Bridge slated for late summer 2007.
- MTC has been talking to its transit partners on implementation of Propositions 1A and 1B.
- Sales tax revenue from the Transportation Development Act increased in the combined nine Bay Area counties by a modest 2.6 percent as compared to 8.3 percent in fiscal 2006.
- The TransLink<sup>®</sup> program performed a rollout for two operators on a soft launch – AC Transit and the Golden Gate Bridge, Highway and Transportation District. An all-out marketing campaign will begin later this year.
- The FasTrak<sup>®</sup> Strategic Plan was adopted in June 2006 and current tasks include marketing FasTrak<sup>®</sup>, adding more FasTrak<sup>®</sup>-only lanes, and lengthening the approaches to these lanes.
- The number of vehicles using FasTrak<sup>®</sup> toll tags comprised 42.2 percent of all paid vehicles in fiscal 2007 compared to 36.3 percent in fiscal 2006. A marketing program including toll tags sold in stores and a one-month discount given to FasTrak<sup>®</sup> users when the bridge toll increased to \$4 in January 2007 were the main reasons for the increase.
- Major work was done to convert call boxes from analog to digital format and to a touch-tone text pad.

(Except as otherwise stated, all amounts described below are expressed in thousands of dollars – '000 removed)

#### **A. Financial Highlights**

Overall, net assets continued to decrease in each of the last two years, with a \$265,182 decrease for 2007 and a \$922,003 decrease for 2006. The fiscal 2007 decreases are primarily the result of planned project drawdowns in the BATA Seismic Retrofit and Regional Measure 1 (RM 1) programs. The decreases in 2006 also reflect project drawdowns in the Regional Measure 1 (RM 1) program and the effects of BATA issuing bonds to allow the California Infrastructure and Economic Development Bank (Ibank) to defease the bonds issued by Caltrans. This transaction is further described as an extraordinary item in Note 12 of the Financial Statements. The net assets decrease is a result of BATA financing the improvements with Caltrans owning the bridges. This decrease in net assets will continue into the future.

# **Metropolitan Transportation Commission**

## **Financial Statements for the years ended June 30, 2007 and 2006**

### **Management's Discussion and Analysis (unaudited), *continued***

---

Net assets in the governmental funds increased \$119,540 or 68.7 percent for 2007 compared to a \$13,617 or 8.5 percent increase for 2006, as reported under the accrual basis of accounting. Net assets in the governmental funds increased by \$128,104 or 112.9 percent for the year ended June 30, 2007, compared to a \$13,297 gain or 13.3 percent increase for the year ended June 30, 2006, as reported under the modified accrual basis of accounting.

At June 30, 2007 fiscal year, the general fund's unreserved fund balances were \$12,870 or 18.3 percent of total general fund expenditures. The general fund unreserved fund balances at June 30, 2006 fiscal year were \$8,832 or 15.2 percent of the total general fund expenditures. The unreserved general fund balance increased by \$4,038 or 45.7 percent in fiscal 2007 mainly due to an operating surplus of \$2,801.

#### **B. Overview of Government-Wide Financial Statements**

The government-wide financial statements provide an overview of MTC and its blended and discretely presented component units. Bay Area Infrastructure Financing Authority (BAIFA), a discretely presented component unit, is presented in a separate column after the Total column in the government-wide Statement of Net Assets. The government-wide financial statements comprise a Statement of Net Assets, a Statement of Activities, and accompanying footnotes. The Statement of Net Assets presents information on the government-wide assets and liabilities of MTC at the end of the 2007 fiscal year. The difference between the assets and liabilities is reported as "Net Assets." The Statement of Activities presents government-wide information showing the change in net assets resulting from revenues earned and expenses incurred during the 2007 and 2006 fiscal years. All changes in net assets are recorded as revenues are earned and expenses are incurred, regardless of the timing of related cash flows.

The government-wide financial statements distinguish business-type activities, which recover a significant portion of costs from user fees or charges, from governmental activities that are principally supported by grants, contributions, taxes and intergovernmental sources.

MTC is composed of governmental and business-type funds and one discretely presented component unit. The governmental funds are comprised of the general fund, the special revenue funds and the capital funds. The business or proprietary funds are BATA, MTC SAFE, and BAIFA. BATA and MTC SAFE are blended component units whose transactions are presented as if they were business-type funds. BAIFA is a discretely presented component unit on the government-wide financial statements. These funds are further described on Note 1A to the Financial Statements.

The government-wide Statement of Net Assets and Statement of Activities are presented on pages 16-19 of this report with the accompanying footnotes being presented on pages 34-74.

**Metropolitan Transportation Commission**

**Management's Discussion and Analysis (unaudited), *continued***

---

**C. Overview of the Fund Financial Statements**

*i.) Governmental Funds*

Governmental funds are used to account for the MTC activities supported by grants, contributions, sales taxes, and intergovernmental revenue sources. These funds focus on the annual inflows and outflows of resources as well as on the balance of resources available to be spent at fiscal year-end rather than the longer term focus of governmental activities as seen in the government-wide financial statements. The governmental fund balance sheet and the governmental fund statement of revenues, expenditures and changes in fund balance provide a reconciliation to facilitate this comparison of governmental funds to governmental activities.

MTC's governmental funds include a general fund, two major special revenue funds, other nonmajor special revenue funds and a capital projects fund. These funds are presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances. The general fund and two of these special revenue funds are considered to be major funds. The financial statements of the governmental funds, prepared under the modified accrual basis of accounting are on pages 20-23 of this report. A schedule detailing the nonmajor special revenue funds are included on pages 81-82 of this report.

MTC adopts annual budgets for all funds. However, a comparison of budget-to-actual is required only for the governmental funds and these are presented on pages 76-78 (major funds) and 83-87 (nonmajor funds) of this report.

*ii.) Proprietary Funds*

Proprietary funds are used to report business-type activities. MTC has two proprietary funds, BATA and MTC SAFE. These funds are presented as blended component units of MTC as if they were proprietary funds on the government-wide and fund financial statements. BATA oversees the administration of toll collection and maintenance activities for the seven state-owned bridges in the San Francisco Bay Area, as well as administers the RM 1 and RM 2 capital improvement programs approved by the voters in 1988 and 2004, respectively. AB 144 was passed on July 2005. As a result of the bill's passage, BATA received more oversight responsibilities over the seismic retrofit program. See Note 12 on page 74 for further information on the impact of AB 144. MTC SAFE administers a freeway motorist aid system providing tow truck and call box services to stranded motorists in the nine Bay Area counties.

The financial statements of the proprietary funds are prepared on an accrual basis and are on pages 25-32.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Management's Discussion and Analysis (unaudited), *continued***

---

iii) Fiduciary Funds

Fiduciary funds are used to account for resources held in a trust or agent capacity for the benefit of parties outside MTC. These funds are not reflected in the government-wide financial statements, as the resources cannot be used to support the programs of MTC or those of its component units. The fiduciary funds of MTC use the economic resources measurement focus and the accrual basis of accounting.

MTC reports on two fiduciary funds, Transportation Development Act (TDA) and BART Half-Cent Sales Tax (AB 1107) funds. Revenue for each of these funds is derived from sales tax revenues. The revenues for the TDA fund are deposited in MTC's name as fiduciary with the respective treasurer in each of the nine counties in the region. The revenues for the AB 1107 fund are deposited with the State of California. MTC has administrative oversight for the allocation of these funds.

The fiduciary funds financial statement is presented on page 33 of this report.

iv) Discretely Presented Component Unit

The Bay Area Infrastructure Authority (BAIFA) was established in August 2006, as a separate public entity pursuant to the California Joint Exercise of Power Act, to plan projects and obtain funding in the form of grants, contributions, appropriations, loans and other assistance and apply funds received to pay debt service on bonds issued by BAIFA to finance or refinance public transportation and related capital improvement projects. BAIFA is presented as a proprietary fund in the discretely presented component unit column of the government-wide financial statement as it does not meet the criteria for blending under the provisions of GASB Statement No. 14.

**D. Notes to the Financial Statements**

The notes to the financial statements, beginning on page 34, provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Management's Discussion and Analysis (unaudited), continued**

**E. Government-Wide Financial Analysis**

Total government-wide liabilities exceeded total assets for fiscal 2007 by \$1,356,625 while total government-wide liabilities exceeded assets by \$1,091,443 for fiscal 2006 as illustrated in the following table. This represents a decrease in net assets for fiscal 2007 of \$265,182 and a decrease of \$922,003 for fiscal 2006.

*i.) Statement of Net Assets*

The following table shows a portion of the MTC's government-wide statements of net assets for the last 3 years:

Metropolitan Transportation Commission's Statement of Net Assets (\$000)									
	Governmental			Business-Type			Total		
	Activities			Activities					
	2007	2006	2005	2007	2006	2005	2007	2006	2005

Total liabilities	54,481	34,216	22,616	4,433,664	3,283,858	1,098,562	4,488,145	3,318,074	1,121,178
Net assets:									
Invested in capital assets, net of related debt	6,015	5,827	6,051	5,596	5,539	4,895	11,611	11,366	10,946
Restricted	157,234	117,117	104,451	691,735	643,444	257,670	848,969	760,561	362,121
Unrestricted	130,205	50,970	49,795	(2,347,410)	(1,914,340)	(592,302)	(2,217,205)	(1,863,370)	(542,507)
Total net assets / (deficit)	\$ 293,454	\$ 173,914	\$ 160,297	\$ (1,650,079)	\$ (1,265,357)	\$ (329,737)	\$ (1,356,625)	\$ (1,091,443)	\$ (169,440)

Government-wide cash and investments increased from \$2,042,330 to \$2,913,905 in the current year due mainly to the bond proceeds from the 2007 bonds issuance of \$810,950 and the scheduled payment of state funds of \$273,000 for the Seismic Retrofit program. For the fiscal year ended June 30, 2006, the government-wide cash and investment balances rose from \$838,231 to \$2,042,330. The increase is primarily due to the bond proceeds received by BATA.

Under the business-type activities, BATA's net long-term debt excluding the non-current liabilities for unearned revenue, rebate arbitrage liability and a payable due to the Bay Area Infrastructure Financing Authority (described in the following paragraph) increased \$725,164 or 23.3 percent in 2007 and \$2,119,416 or 212.9 percent in fiscal year 2006. The net long-term debt increase is due mainly to the issuance of the 2007 Series A-G bonds of \$810,950 in May 2007, less principal payments and the application of a portion of 2007 Series F bond proceeds for the defeasance of \$61,415 of the 2001 Series D Bonds. The long-term debt increase in fiscal year 2006 is the result of the issuance of the 2006 Series A-E Bonds in February 2006 and the 2006 Series F Bonds in April 2006. The debt is further described in Note 5 and Schedules 14-17 in the financial statements.

In fiscal year 2007, BATA entered into contribution agreement with the Bay Area Infrastructure Financing Authority (BAIFA). Under the contribution agreement, BATA pledged and irrevocably assigned to BAIFA \$1,135,000 of future state payments representing part of the State of California's share for the seismic retrofit and replacement program. The state payments are provided for in state legislation. In December 2006, BAIFA issued notes called State Payment Acceleration Notes

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Management's Discussion and Analysis (unaudited), *continued***

---

(SPAN) of \$972,320. As BATA incurs expenses for the seismic projects, BAIFA reimburses BATA from the note proceeds. For fiscal year 2007, BATA has a net payable to BAIFA of \$389,367. Of the total liability to BAIFA, \$99,979 is current and \$289,388 is non-current. The transactions are accounted for under Governmental Accounting Standards Board Statement Number 48 on "Sales and Pledges of Receivables and Future Revenues and Intra-Entity Transfers of Assets and Future Revenues."

Under the business-type activities, other liabilities for fiscal 2007 increased by \$138,439 or 82.9 percent over fiscal year 2006 due to several items. In fiscal year 2006, other liabilities increased \$63,747 or 61.7 percent from the previous fiscal year. During 2007, the current portion of the payable to BAIFA resulted in \$99,979 of added liability to be repaid with the upcoming year's scheduled payment of pledged revenue to BAIFA. The payable due to Caltrans decreased by \$32,814 in 2007 and increased \$11,023 in 2006 due to the timing of the payments. Combined accounts payable and accrued expenses increased \$54,631 in 2007 and \$19,596 in 2006, mainly from RM 2 claimants for capital projects and interest payable. Unearned revenues from patrons of the FasTrak<sup>®</sup> program increased by \$2,508 in fiscal year 2007 and \$8,867 in 2006. The current portion of long-term debt payable increased by \$12,915, as additional bonds became mature in 2007, and by \$23,920 in 2006. Accrued interest payable increased \$10,055 over fiscal year 2006 from additional bond interest expense incurred.

Net assets for business-type activities decreased \$384,722 in 2007 and \$935,620 for fiscal 2006. The net assets decrease in fiscal year 2007 is mainly from the Seismic Retrofit and RM 1 program drawdowns, while the decrease in 2006 is mainly due to the distribution of \$1,119,563 held in an escrow account on behalf of Caltrans for the defeasance of its seismic dollar-backed bonds and drawdowns for the RM 1 program. During fiscal year 2006, Caltrans remitted \$462,951 in contributions to BATA from its Toll Bridge Seismic Retrofit Fund, as stipulated in AB 144. Caltrans also identified an additional \$36,452 as a payable to BATA for contributions in fiscal 2006.

The restricted net assets of business-type activities decreased in fiscal 2007 by \$48,291 or 7.5 percent compared to an increase of \$385,774 or 149.7 percent for fiscal 2006. In 2006, restricted net assets of business-type activities increased, mainly due to the contributions from Caltrans in the Seismic Retrofit reserve of \$378,168. The monies are designated for the seismic retrofit of the Bay Area state-owned toll bridges. The total business-type unrestricted net assets decreased by \$433,070 in fiscal 2007 and by \$1,322,038 for 2006. These decreases are again due to the BATA Seismic Retrofit and RM 1 program drawdowns and 2006 had the additional payment to an escrow account for the defeasance of the bonds held by Caltrans.

BATA is the financing arm for the Regional Measures 1, 2, and Seismic Retrofit programs. The remaining debt as of June 30, 2007, is \$3,882,492. The cash proceeds from these debts are used to reimburse Caltrans for capital construction costs and for the defeasance of the Caltrans bonds held by the Ibank. Since the bridges are not capitalized under BATA, title remains with Caltrans, so the combination of distributions to Caltrans and increased debt to pay for project expenditures create a negative asset. Future toll revenues are pledged to cover debt service payments. BATA owns the toll revenue stream and the debt. Caltrans owns the bridges and is doing the capital construction work, which is reimbursed by BATA. This information is more fully described in Note 2 of this report.

*ii) Statement of Activities*

MTC's net assets for governmental activities increased by \$119,540 or 68.7 percent for fiscal 2007 and an increase of \$13,617 or 8.5 percent for fiscal 2006. The business-type activities decreased by \$384,722 or 30.4 percent for fiscal year 2007 and decreased by \$935,620 or 283.7 percent in 2006. A breakdown of this activity is illustrated in the table below:

Metropolitan Transportation Commission's Statement of Activities (\$000)									
	Governmental			Business-Type			Total		
	Activities			Activities					
	2007	2006	2005	2007	2006	2005	2007	2006	2005

Net assets / (deficit) - Ending	\$ 293,454	\$ 173,914	\$ 160,297	\$ (1,650,079)	\$ (1,265,357)	\$ (329,737)	\$ (1,356,625)	\$ (1,091,443)	\$ (169,440)

Charges for services program revenue increased by \$141,341 for 2007, and \$36,534 in fiscal 2006. The increase for charges for services in the business-type activities is explained in Section F of this discussion.

Operating grants and contributions increased by \$536,884 or 807.2 percent in fiscal 2007 and increased by \$8,215 or 14.1 percent in fiscal 2006. The fiscal 2007 increase represents Spillover funds of \$87,637 and Proposition 42 funds of \$62,887 for the STA program. Higher fuel prices in fiscal 2007 also created a significant increase in STA revenue. Caltrans paid BATA \$125,000 of revenue that BATA assigned to BAIFA. Caltrans also paid BATA \$148,000 of state funds as part of its required annual contribution to the seismic program.

Capital grants and contribution revenue decreased in fiscal 2007 by \$568,938 or 99.8 percent compared to an increase in fiscal 2006 of \$525,216 or 1168.2 percent. The large decrease in 2007 is due to a large contribution of \$499,403 from Caltrans for the Seismic Fund closeout in fiscal 2006. This represented the final payment to BATA to assume the consolidation of all the bridge toll revenue.

Investment earnings increased in fiscal 2007 by \$59,335 or 121.5 percent and increased by \$24,315 or 99.1 percent in 2006. The majority of the increases for both fiscal years 2007 and 2006 are attributable to the business-type activities. See Section F for a further explanation of the business-type activities.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Management's Discussion and Analysis (unaudited), *continued***

---

Allocations to other agencies increased by \$57,915 or 66.0 percent in fiscal 2007, compared to a increase in fiscal 2006 of \$15,846 or 22.0 percent. The increases in fiscal years 2007 and 2006 is mainly due to the allocations from the STA fund as the STA revenue increased for both fiscal years 2007 and 2006.

MTC's net assets for business activities decreased by \$384,722 or 30.4 percent in 2007. Toll bridge activities expenses increased by \$538,370 or 87.2 percent versus an increase of \$183,843 or 42.4 percent in fiscal 2006. The additional toll bridge activities in fiscal 2007 are due to increases in operating expenses, bond interest expense, RM 2 capital distribution to other agencies and capital distributions to Caltrans. See the next section for further explanation of these differences in the business-type activities.

BAIFA had program revenues from operating grants and contribution of \$34,950 during the first eleven months consisting of \$15,000 in contribution from BATA and \$19,950 in interest income. Interest expense paid and accrued to date for the SPANs was \$25,185 less amortization of bond premium of \$2,895 for total interest expense of \$22,291. Other expenses include amortization of bond issuance costs and administrative fees of \$671 for total expenses of \$22,962.

**F. Financial Analysis of Business-Type Activities**

The following table shows the results of operations for the last three years.

<u>Business-Type Activities (\$000)</u>			
	2007	2006	2005
<b>Revenues:</b>			
Toll revenues collected by Caltrans	\$ 422,355	\$ 280,277	\$ 248,141
Other operating revenues	11,987	12,723	8,325
Total revenues	434,342	293,000	256,466
<b>Operating expenses:</b>			
Operating expenses incurred by Caltrans	29,576	32,657	37,582
Other operating expenses	88,127	61,080	35,397
Total operating expenses	117,703	93,737	72,979
Operating income/(loss)	316,639	199,263	183,487
<b>Non-operating revenues/(expenses)</b>			
Interest income	97,280	44,857	21,747
Interest expense	(131,439)	(63,146)	(35,374)
Bond issuance cost	(1,066)	-	-
Operating grant	283,082	-	-
Contributions from Caltrans	1,235	499,403	-
Contribution to BAIFA	(15,000)	-	-
Distributions to other agencies for their capital purposes	(907,485)	(473,065)	(337,140)
Other	(116)	8,869	8,130
Total non-operating revenues (expenses)	(673,509)	16,918	(342,637)
Income/(loss) before transfers, contributions, and extraordinary item	(356,870)	216,181	(159,150)
<b>Transfers</b>			
Transfers to Metropolitan Transportation Commission	(27,852)	(32,238)	(27,074)
Income/(loss) before extraordinary item	(384,722)	183,943	(186,224)
<b>Extraordinary item</b>			
Distribution for Caltrans bond defeasance	-	(1,119,563)	-
Change in net assets	(384,722)	(935,620)	(186,224)
Total net assets / (deficit) - beginning	(1,265,357)	(329,737)	(143,513)
Total net assets / (deficit) - ending	\$ (1,650,079)	\$ (1,265,357)	\$ (329,737)

Fiscal year 2007 toll revenue of \$422,355 for the seven bridges was \$142,078 higher compared with the prior year. The increase in 2007 was primarily as a result of the collection of an extra dollar in tolls for 9.7 months that in prior fiscal year was distributed to the Caltrans Toll Bridge Seismic Retrofit Account. Assembly Bill (AB) 144 consolidated all toll revenues including the seismic dollar under BATA administration. The transfer of seismic surcharge from Caltrans to BATA in late April 2006 accounted for \$93,983 of the increase in revenues in fiscal year 2007. Another factor contributing to the additional revenue in fiscal 2007 was the increase of a second seismic dollar in tolls for cash customers on January 1, 2007 and electronic toll-paying patrons on February 1, 2007. The second seismic toll dollar brought in an additional \$53,101 in toll revenue in fiscal year 2007. Excluding these two factors, total toll revenue would decrease by \$5,006. Total number of paid toll vehicles for all bridges decreased by 1.4 percent compared to the prior year. The paid vehicle counts increased on the Antioch and Richmond-San Rafael bridges and decreased on the Carquinez, Benicia-Martinez, San Mateo-Hayward, and Dumbarton and San Francisco-Oakland Bay bridges. Detailed traffic counts are available in the statistical section, Table 8.

## **Metropolitan Transportation Commission**

### **Financial Statements for the years ended June 30, 2007 and 2006**

#### **Management's Discussion and Analysis (unaudited), *continued***

---

Fiscal year 2006 toll revenue of \$280,277 was \$32,136 higher compared to 2005. The increase was due to the collection of an extra dollar in toll for 2.3 months amounting to \$23,566 that previously was distributed to Caltrans Toll Bridge Seismic Retrofit Account. Another factor contributing to the increase was the discontinuance of a discount program for electronic toll patrons in effect for the first 4 months of fiscal year 2005. Fiscal year 2006 did not include such a discount resulting in \$12,385 more toll revenue than 2005.

BATA's other operating revenues decreased \$810 for 2007 and increased \$4,369 in fiscal 2006. The 2007 decrease is the result of the discontinuance of commercial credit customer fees and lower violation revenue. The 2006 fiscal year increase in other operating revenue is a result of higher penalty assessments for toll violators implemented in June 2005.

BATA's total operating expenses rose by \$19,338 or 23.7 percent in 2007 and by \$20,400 or 33.3 percent in 2006. In both years, the increases in total operating expenses are due to several categories. An additional \$6,888 in 2007 and \$10,563 are related to the increase in allocation expenses to other agencies for the RM 2 operating projects. Professional fees were \$10,594 higher in 2007 and \$8,600 higher in 2006 than in the preceding year. The increases in professional fees for fiscal 2007 and 2006 are mainly due to purchases of additional toll tags, professional services for the expanded operation of the FasTrak<sup>®</sup> program and financing activities of the new bonds. Salaries and benefits increased \$2,213 in 2007 and \$1,336 in 2006. The salary increases relate to the transition of Caltrans employees to BATA in mid-2006. Other expenses increased \$3,228 in 2007 as a result of additional bank service charges, advertising expenses for FasTrak<sup>®</sup> and Department of Motor Vehicle fees associated with the enforcement of toll violations. Other expenses increase \$4,316 in 2006. Operating expenses incurred by Caltrans in 2007 decreased \$3,081 and \$4,926 in 2006. The decreases are due to the consolidation of the accounting, information technology, banking and electronic toll collection activities into BATA's operations and offset some of the increases in other categories of expenses.

Investment and interest income for 2007 of \$96,415 represents an increase of 118.8 percent from 2006. The 2006 interest income of \$44,857 represented an increase of 106.3 percent over fiscal 2005. The increases are generated from larger cash and investment balances on hand during the years.

Interest expense totaled \$131,439 for 2007 as compared to \$63,146 for 2006. The interest expense increase of \$68,293 in 2007 is primarily due to a full year interest expenses for the 2006 Series A-E of and the 2006 Series F Bonds. These bonds were issued in February and April 2006 and had incurred only partial year interest expense in 2006. The 2006 Series A-E Bonds contributed \$20,072 while the 2006 Series F Bonds contributed \$45,295 to the increase in interest expense. In May 2007, BATA issued the 2007 Series A-G Bonds, which added \$4,309 in additional interest expenses. The interest expense for the 2001 Series Bonds was \$1,484 lower as a portion of the 2007 Series F Bond proceeds were used to defease \$61,415 of the 2001 Series D Bonds in 2007.

Interest expense totaled \$63,146 for 2006 compared to \$35,374 for 2005. The increase is primarily attributable to higher principal balances from two new bond issues. The 2006 Series A-E and the 2006 Series F bonds added \$14,144 and \$10,228 to interest expense for the year. Interest expense in 2006 for the 2004 Series Bonds were \$2,582 higher due to a full year as compared to 9 months of interest expense.

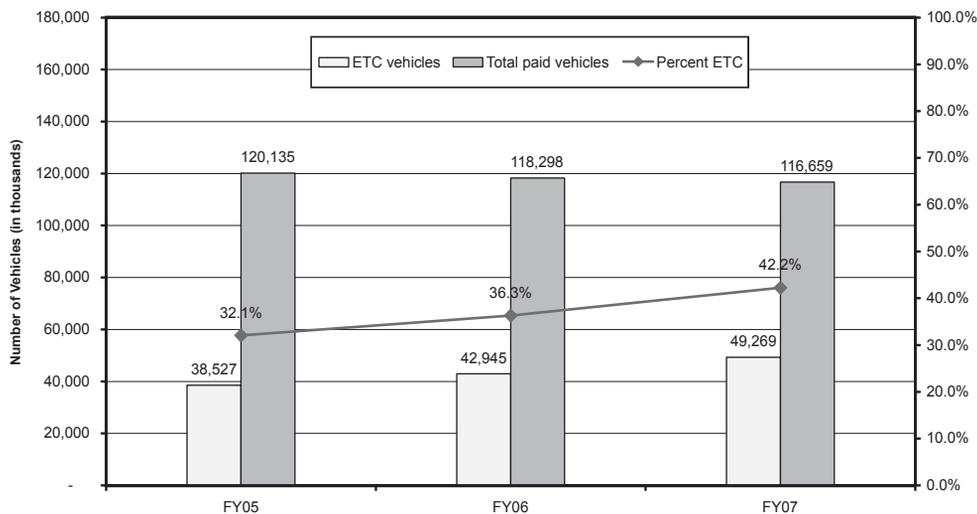

Revenue collections from the FasTrak<sup>®</sup> electronic toll program continue to increase. Electronic toll collection (ETC) revenue for the total number of paid vehicles comprised 42.2 percent of the total paid vehicles in fiscal 2007 compared to 36.3 percent in fiscal 2006 and 32.1 percent for fiscal 2005. The larger increase in fiscal 2007 is due to more FasTrak<sup>®</sup>-only lanes and a marketing program that

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Management’s Discussion and Analysis (unaudited), *continued***

encourages patrons to get transponders from various outlets. The graph on this page illustrates the increase in electronic toll collection (ETC) usage for the last three years.

Service Authority for Freeways and Expressways (SAFE) operating revenues increased by \$73 or 1.2 percent in fiscal year 2007 and increase \$28 or .4 percent in 2006. Operating expense for SAFE increased \$4,628 or 38.1 percent in 2007 and \$359 or 3 percent in 2006. The difference in operating expenses for 2007 fiscal year is due mainly to increase in depreciation of \$3,584 from the previous year. The additional depreciation expenses were primarily for bringing call boxes to current code specifications and in line with the depreciated life of the assets.

**ETC Usage by Fiscal Year**

**G. Financial Analysis of Governmental Funds**

The fund balance of the MTC governmental funds was \$241,609 and \$113,505 for fiscal years 2007 and 2006, respectively, as reported under the modified accrual basis of accounting. The fund balance includes reserved and unreserved funds. Of the fund balance, an amount of \$99,694 is reserved for capital projects for fiscal 2007 and \$47,660 for fiscal 2006. An unreserved balance of \$117,335 and \$44,556 for fiscal 2007 and 2006, respectively, is to be used for purposes specific to the special revenue and capital projects funds. An amount of \$11,710 of the fund balance for 2007 and \$12,457 for 2006 has been reserved for specific Commission or other legal purposes. The remaining balance of \$12,870 for 2007 and \$8,832 for 2006 represents unreserved funds available for appropriation at the government’s discretion.

The following table illustrates the revenues and expenditures for the past three fiscal years. Refer to page 24 for the reconciliation of the governmental funds to the Statement of Activities.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Management's Discussion and Analysis (unaudited), *continued***

<u>Governmental Funds (\$000)</u>			
	2007	2006	2005
<b>Revenues:</b>			
Sales taxes	\$ 10,626	\$ 10,355	9,562
Grants - Federal	44,210	37,452	32,568
Grants - State	227,808	74,084	47,340
Local agency revenues	37,666	6,520	5,653
Investment income	9,499	3,997	2,790
Total revenues	329,809	132,408	97,913
<b>Expenditures:</b>			
<b>Current:</b>			
General government	59,181	49,945	38,805
Allocations to other agencies	156,210	95,765	81,185
Capital outlay	14,166	5,639	10,540
Total expenditures	229,557	151,349	130,530
Transfers in	27,852	32,238	27,075
Net change in fund balance	128,104	13,297	(5,542)
Fund balance - beginning	113,505	100,208	105,750
Fund balance - ending	\$ 241,609	\$ 113,505	\$ 100,208

MTC's sales tax revenue increased for the fourth straight year. The increase for fiscal 2007 was \$271 or 2.6 percent. The increase in state and other agencies revenue for fiscal 2007 was \$184,870. This increase is due to revenue for the BART car replacement project of \$22,680, receipt of payment on the BART loan of \$10,000, and an increase of \$149,456 for state transit assistance funds. The state transit assistance funds include an increase from Proposition 42 of \$39,000, an increase in the revenue-based portion of \$80,000 and an increase in the population-based portion of \$30,000. The increase in state and other agencies revenue for fiscal 2006 was \$27,611.

Total general government expenditures increased \$9,236 in fiscal year 2007. The increase in fiscal 2007 is due to program expenditures of \$7,115 and an increase in salaries and benefits of \$2,447. Program expenditures include increases to the Spare the Air program of \$2,758 and \$2,473 of expenditures for the MacArthur Maze emergency response. Total general government expenditures increased \$11,140 in fiscal year 2006. Allocations to other agencies increased by \$60,445 or 63.1 percent for fiscal 2007. Since the STA revenue was higher this year, the allocations for the STA program increased by \$69,383 and the allocations from the Rail Reserve fund decreased by \$6,854.

The increase in capital outlay for fiscal 2007 of \$8,527 is due to increased TransLink<sup>®</sup> expenditures for the AC Transit and Golden Gate Bridge, Highway and Transportation District soft launch of the TransLink<sup>®</sup> program, site preparation and design expenditures.

**H. General Fund**

The final fiscal year 2007 general fund revenue budget for MTC for the year was \$87,723, an increase of \$9,966 over the original budget adopted on July 1, 2006.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Management's Discussion and Analysis (unaudited), *continued***

---

The following provides a condensed view of the final budgeted results compared to actual results for the year ended June 30, 2007.

	General Fund Budget			
	Adopted Budget	Final Budget	Actual	Variance
Revenues	\$ 77,757	\$ 87,723	\$ 54,382	\$ (33,341)
Expenditures	97,715	116,006	70,277	45,729
Excess/(Deficiency)	(19,958)	(28,283)	(15,895)	12,388
Transfer in	17,226	25,551	18,696	(6,855)
Net change in fund balance	(2,732)	(2,732)	2,801	5,533
Fund balance - beginning	24,018	24,018	24,018	-
Fund balance - ending	\$ 21,286	\$ 21,286	\$ 26,819	\$ 5,533

The principal reason for the revenue increase in the final budget from the adopted budget was due to state and federal grants of \$9,510. The expenditures associated with this increase was in the Spare the Air program and the MacArthur Maze emergency response along with prior year encumbrances brought forward from the previous year.

MTC's federal and state funding sources are on a reimbursement basis so it is not unusual for revenue to lag behind the budget. Expenditures were also well below budget, with a net increase in fund balance of \$2,801 after transfers.

Actual expenditures are lower than budget as not all the programs budgeted were completed by year-end.

The general fund's fund balance increased by \$2,801 at June 30, 2007 due mainly to an increase in sales tax revenue and BATA's administrative fee to MTC is based on its operating revenue which increased in fiscal 2007 from fiscal 2006 due to a full year of additional revenue from the seismic dollar whereas the seismic dollar was in effect for two months in fiscal 2006.

**I. Capital Asset Administration**

MTC's investment in capital assets for all funds, governmental and proprietary, is \$11,730 for fiscal 2007 and \$11,221 for fiscal 2006 as reported under the accrual basis of accounting. There were construction in progress costs incurred of \$337 in fiscal 2007 for the seismic retrofit work of MTC's offices. Three hundred ninety-six call boxes were removed due to higher usage of cell phones, with a net book value of \$1 in fiscal 2007. Call box enhancements were \$450 for fiscal year 2007. The second floor office remodel was completed during fiscal year 2006 to include additional improvements of \$1,134. Assets relating to the seven state-owned bridges administered by BATA are recorded with Caltrans.

Additional information on MTC's capital assets is disclosed in Note 4 on pages 53-55 of this report.

**J. Long-Term Debt Administration**

BATA issued one bond series in fiscal 2007. The 2007 Series A-G Bonds of \$810,950 was issued in May 2007 to finance the costs of capital improvements projects for some of the seven Bay Area toll bridges and to refund a portion of the BATA 2001 Series D Bonds. Total 2001 Series D Bonds refunded was \$61,415.

# **Metropolitan Transportation Commission**

## **Financial Statements for the years ended June 30, 2007 and 2006**

### **Management's Discussion and Analysis (unaudited), *continued***

---

*Component Unit - BAIFA.* In December 2006, BATA entered into a contribution agreement with the Bay Area Infrastructure Financing Authority. Under the contribution agreement, BATA pledged and assigned its rights to future scheduled payments of \$1,135,000 from the State of California to BAIFA. Annual payments to BAIFA are scheduled through year 2014. The amount represents a part of the state's share of the seismic retrofit and replacement program. In the same month, BAIFA issued State Payment Acceleration Notes (SPAN) of \$972,320. BAIFA deposited a portion of the bond proceeds, \$887,991, in an account for reimbursement to BATA for the seismic project expenses in return for the pledged revenues. BAIFA used the remaining note proceeds for deposit in the Pledged Revenue Fund, Reserve Fund or payment for the cost of issuance.

Additional information on MTC's long-term debt can be found in Note 5 on pages 56-66 of this report.

#### **K. Economic Factors Impacting MTC**

The Bay Area economy has been impacted by gas prices, the slowdown in sales and construction of the housing market, and an increase in the number of foreclosures. There are concerns about the collapse of the sub-prime mortgages. The Association of Bay Area Governments sees moderate growth for the remainder of the year. General factors include:

- Unemployment in the Bay Area has been steady at less than 5 percent.
- There was a 2.6 percent increase in sales tax revenue for the combined nine Bay Area counties, down from the prior fiscal year by 8.3 percent. Region-wide sales tax revenue increased for the fourth straight year after two straight declining years. A small increase for sales tax revenue for fiscal 2008 is projected.
- Housing market sales and residential construction have slowed down. Rising delinquencies in sub-prime mortgages have also contributed to this.

#### **Requests for information**

This financial report is designed to provide a general overview of the Metropolitan Transportation Commission's financial position for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Chief Financial Officer, Metropolitan Transportation Commission, 101 8<sup>th</sup> Street, Oakland, CA 94607.

Amounts reported for governmental activities in the statement of net assets are different because:						
Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds						
Capital leases are not due and payable in the current period and therefore are not reported in the funds						
Compensated absences are not due and payable in the current period and therefore are not reported in the funds						
Other long-term assets are not available for current-period expenditures and, therefore, are deferred in the funds						
Net assets of governmental activities						
						\$ 173,913,801

**Metropolitan Transportation Commission  
 Reconciliation of the Statement of Revenues, Expenditures and Changes  
 in Fund Balances – Governmental Funds to the Statement of Activities  
 For the Years Ended June 30, 2007 and 2006**

	2007	2006
<b>Net change in fund balances - total governmental funds (per Statement of Revenues, Expenditures and Changes in Fund Balances)</b>	\$ 128,103,925	\$ 13,296,923
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which the depreciation expense exceeded (not exceeded) non capital lease capital outlays in the current period.	306,602	(380,349)
Proceeds from the sale of capital assets provide financial resources to governmental funds while only the gain on the sale of the capital asset is reported in the statement of activities. Therefore, the change in net assets differ from the change in fund balance by the cost of the capital asset sold.	-	(96)
Interest Income on Long Term Loan Receivable not recognized in fiscal year 2007 for governmental reporting purposes	1,410,000	-
Prepayment of the principal of the long-term receivable from BART is not recorded as a long term asset in the governmental funds for fiscal 2007. Loan advances (repayments received) to/from the agency were recorded as expense (income) in the governmental fund but were capitalized as a long-term asset in the statement of net assets.	(10,000,000)	910,000
Principal repayment on capital leases in an expenditure in the governmental funds; however, the principal element of the repayment reduces long-term liabilities in the statement of net assets. This amount is the effect of the differing treatment of capital lease principal repayment.	29,967	24,253
Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds: Compensated absences	(310,318)	(233,940)
<b>Change in net assets of governmental activities (per Statement of Activities)</b>	<u>\$ 119,540,176</u>	<u>\$ 13,616,791</u>

The accompanying notes are an integral part of these financial statements.

### **Notes to Financial Statements**

---

#### **1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

##### **A. Reporting Entity**

The Metropolitan Transportation Commission (MTC) was established under Government Code Section 66500 et seq. the laws of the State of California (State) in 1970 to provide comprehensive regional transportation planning for the nine counties that comprise the San Francisco Bay Area, which includes the City and County of San Francisco and the Counties of Alameda, Contra Costa, Marin, Napa, San Mateo, Santa Clara, Solano and Sonoma.

The MTC's principal sources of revenue to fund its operations include state grants, a percentage of the sales tax revenues collected in the nine Bay Area Counties under the State Transportation Development Act of 1971 (TDA) and grants from the U.S. Department of Transportation, Office of the Secretary of Transportation (U.S. DOT), including the Federal Highway Administration (FHWA), Federal Transit Administration (FTA) and other federal, state and local agencies. These are the principal sources of revenue susceptible to accrual under the modified accrual method described later within this note.

The accompanying financial statements present MTC, its blended component units, and its discretely presented component unit. MTC is the primary government as defined in Governmental Accounting Standards Board Statement No. 14. Its governing board is separately appointed and it is fiscally independent of other governments. The blended component units discussed below are included as part of the reporting entity because their boards are substantially the same as the primary government's board. The blended component units, although legally separate entities are, in substance, part of the MTC's operations and financial data from these units are combined with financial data of MTC in preparing the government-wide financial statements. The Commission serves as the governing body for MTC and all its blended component units.

MTC has one discretely presented component unit – Bay Area Infrastructure Financing Authority (BAIFA). As such, BAIFA is presented in a separate column on the face of the government-wide financial statements on the far right column.

##### ***Blended component units***

###### **i.) Bay Area Toll Authority**

The Bay Area Toll Authority (BATA) is a public agency created by Senate Bill 226 effective January 1, 1998. Senate Bill 226 amended Streets and Highway Code Section 30950 et seq. and transferred to BATA certain California Transportation Commission (CTC) and State of California, Department of Transportation (Caltrans) duties and responsibilities for the disposition of toll revenues collected from toll bridges owned and operated by Caltrans in the San Francisco Bay Area. These responsibilities also include administration of the Regional Measure 1 capital improvement program approved by the voters in 1988. The toll bridges are the Antioch Bridge, Benicia-Martinez Bridge, Carquinez Bridge, Dumbarton Bridge, Richmond-San Rafael Bridge, San Francisco-Oakland Bay Bridge and San Mateo-Hayward Bridge.

# **Metropolitan Transportation Commission**

## **Financial Statements for the years ended June 30, 2007 and 2006**

### **Notes to Financial Statements**

---

Pursuant to Senate Bill 226, a five year Cooperative Agreement was signed on March 2, 1998 defining the roles and responsibilities of BATA and Caltrans. A new ten-year agreement was signed in January 2003 and amended in 2005. The current ten-year agreement was signed in 2006.

BATA is required to prepare and adopt a budget by July 1 for each fiscal year. BATA adopted a Long Range Plan for Regional Measure 1 projects as required by the Streets and Highway Code. With the concurrence of Caltrans, the plan gives first priority to projects and expenditures that are deemed necessary by Caltrans to preserve and protect the bridges as provided by the Streets and Highway Code and to pay Caltrans for costs incurred and as authorized in the annual budgets adopted by BATA.

In March 2004, seven Bay Area counties approved Regional Measure 2 (RM2). Regional Measure 2 increased the bridge toll by one dollar for all seven bridges in order to fund various capital and operating programs for congestion relief. BATA controls the RM2 allocations. This dollar surcharge became effective July 1, 2004.

Caltrans' responsibilities include the ownership, operation and maintenance of the bridges. Under the terms of the Cooperative Agreement signed in January 2003, BATA assumed responsibility for electronic toll collection starting in April 2004. BATA's FasTrak<sup>®</sup> Center consolidated its operations to include Golden Gate Bridge Highway and Transportation District on May 30, 2005.

The California State Legislature approved Assembly Bill (AB) 144 on July 18, 2005, which transferred additional Caltrans responsibilities to BATA, namely toll plaza administration responsibility. This responsibility includes consolidation of all the bridge revenue, including the state seismic dollar for the seven bridges, under BATA's administration. The state seismic dollar was formerly administered by Caltrans to be used to complete the Seismic Retrofit Program. AB 144 also created a new seismic project oversight board, called the Toll Bridge Project Oversight Committee. This Committee consists of Caltrans, BATA, and the California Transportation Commission. This Committee has oversight for the Benicia-Martinez Bridge project and the state toll bridge seismic retrofit program, which includes reviewing bid documents, change orders, and monitoring ongoing costs. The bill also gave BATA unlimited project level toll revenue setting authority to complete the Seismic Retrofit Program. Caltrans had previously issued bonds that were backed by the revenue generated by the seismic dollar. BATA issued bonds to defease the Caltrans bonds, which had been issued by the California Infrastructure and Economic Development Bank (Ibank). BATA distributed the bond proceeds to the escrow bank for defeasance of the Caltrans bonds on April 25, 2006.

BATA is a proprietary fund as it generates revenue from toll bridge receipts.

#### **ii.) MTC Service Authority for Freeways and Expressways (MTC SAFE)**

In June 1988, the MTC SAFE was created to receive fees collected by the Department of Motor Vehicles pursuant to Streets and Highways Code Section 2500 et seq., which

# Metropolitan Transportation Commission

## Financial Statements for the years ended June 30, 2007 and 2006

### Notes to Financial Statements

---

permits the collection of up to \$1 per registered vehicle in participating counties. These fees represent charges for services rendered to external users. The MTC SAFE is responsible for administering a freeway motorist aid system in the participating counties, referred to as the Call Box program. The following counties are participants in the MTC SAFE: San Francisco, Alameda, Contra Costa, Marin, Napa, San Mateo, Santa Clara, Solano and Sonoma.

In 1993, the MTC SAFE's responsibilities were expanded, pursuant to a jointly adopted Memorandum of Understanding between the MTC SAFE, Caltrans, and the California Highway Patrol (CHP), to participate in the development and implementation of a Freeway Service Patrol (FSP) program in the San Francisco Bay Area. The three principal sources of funding for the FSP program are state-legislated grants, federal grants, and funding from federal traffic mitigation programs. In addition, the Call Box program supports the FSP program by transferring funds each year.

The management of the MTC SAFE has contracted with the MTC to utilize the administrative personnel and facilities of the MTC at no cost.

#### iii.) MTC Special Revenue Funds

**AB 664 Net Toll Revenue Reserve Fund** – These funds are allocated, seventy percent to East Bay and thirty percent to West Bay, to capital projects that further the development of public transit in the vicinity of the three southern Bay Area bridges, including transbay and transbay feeder transit services. Substantially all of the current AB 664 Net Toll Revenue Reserves are used to match federal transit funds designated for replacement buses and capital facility improvement. Section 30884 (a) of the Streets and Highway Code states the AB 664 Net Toll Revenue receives 16 percent of the base toll revenues collected on the three southern bridges, San Francisco-Oakland Bay Bridge, Dumbarton Bridge, and San Mateo-Hayward Bridge.

**State Transit Assistance (STA) Fund** – State Transit Assistance funds are used for transit and Paratransit operating assistance, transit capital projects, and regional transit coordination. STA funds are derived from the state sales tax on fuel and apportioned by state statute between population-based and revenue-based accounts. PUC Section 99313 defines population-based funds and PUC Section 99314 defines revenue-based funds.

**Transit Reserve Fund** – The 1988 Regional Measure 1 toll increase authorizes up to 3 percent of toll revenue to be used for congestion-relieving transit operations and capital projects in the bridge corridors and an additional 2 percent of the increase to be used for ferry service capital projects. The calculation of the transit reserves was revised in Section 30913 (b) of the Streets and Highway Code to 1/3 of 2 percent of base toll revenues collected on all seven Bay Area state-owned bridges effective January 1, 2004. When the state-owned toll bridges became eligible for federal funding in April 2000, transit operations could no longer be funded because federal funding guidelines allow toll revenues to be used for transit capital projects only.

# Metropolitan Transportation Commission

## Financial Statements for the years ended June 30, 2007 and 2006

### Notes to Financial Statements

---

Caltrans entered into a Cooperative Agreement with BATA and MTC whereby Caltrans transferred state funding (Five Percent Unrestricted State Funds) to MTC to replace the Toll Funds previously used for transit operations. As a result of this agreement, new programming and allocation policies were established in MTC Resolution No. 3288, with the Unrestricted State Funds supporting ferry operations and other transit/bicycle projects, and toll revenue transfers limited to ferry capital improvements.

**Rail Reserve Fund** – Rail reserve extension funds are allocated exclusively for rail transit capital extension and improvement projects that are designed to reduce vehicular traffic congestion on the San Francisco-Oakland Bay Bridge. Seventy percent of the Rail Extension Reserves are allocated for East Bay rail improvements and the remaining 30 percent for West Bay rail improvements. Section 30914 (a.4) of the Streets and Highway Code states that rail extension reserve receives 21 percent of base toll revenues collected on the San Francisco-Oakland Bay Bridge.

**Exchange Fund** – Exchange Funds are used for MTC projects adopted as part of its State Transit Program (STP) and Congestion Mitigation and Air Quality Improvement (CMAQ) programs.

**BART Car Exchange Fund** – Funds deposited are restricted for the purpose of the BART car replacement projects.

**Feeder Bus Fund** – Are to reimburse various transit operators for operating the BART Express Bus Program.

#### **iv.) MTC Capital Projects Fund**

MTC Capital Projects Fund is used to account for the financial resources used in the acquisition and development of major capital projects. The TransLink<sup>®</sup> project and fund management project are the capital projects included in the current fiscal year.

#### ***Discretely presented component unit***

##### **i.) Bay Area Infrastructure Financing Authority**

The Bay Area Infrastructure Financing Authority (BAIFA) was established in August 2006 pursuant to the California Joint Exercise of Powers Act, consisting of Sections 6500 through 6599.2 of the California Government Code to provide for the joint exercise powers common to Metropolitan Transportation Commission (MTC) and the Bay Area Toll Authority (BATA), where two or more public agencies may enter into an agreement to establish an agency to exercise any power common to the contracting parties. The governing board of BAIFA consists of four MTC Commissioners and two BATA Commissioners. BAIFA is authorized to plan projects and obtain funding in the form of grants, contributions, appropriations, loans and other assistance from the United States and from the state of California and apply funds received to pay debt service on bonds issued by BAIFA to finance or refinance public transportation and related capital improvements projects. BAIFA is presented as a proprietary fund in the discretely

## Financial Statements for the years ended June 30, 2007 and 2006

### Notes to Financial Statements

---

presented component unit column of the government-wide financial statements because it does not meet the criteria for blending under the provisions of GASB Statement No. 14, *the Financial Reporting Entity*.

#### **B. Government-Wide and Fund Financial Statements**

The government-wide financial statements (i.e. Statement of Net Assets and Statement of Activities) report information on all non-fiduciary activities of MTC and its component units. The effect of inter-fund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenue, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges for support.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Individual governmental funds and individual enterprise funds are reported as separate columns in the fund financial statements.

#### **C. Measurement Focus, Basis of Accounting and Financial Statement Presentation**

MTC presents its financial statements in accordance with Governmental Accounting Standards Board (GASB) Statement No. 34, *Basic Financial Statements – Management’s Discussion & Analysis – for State and Local Governments* as amended. GASB 34 establishes standards for external financial reporting for state and local governments and requires that resources be classified for accounting and reporting purposes into three net asset categories; namely, those invested in capital assets, net of related debt, restricted net assets and unrestricted net assets.

For the year ended June 30, 2006, MTC adopted GASB Statement No. 44, *Economic Condition Status Reporting: The Statistical Section*. GASB 44 provides guidance and objectives for the statistical reporting of information found in GASB 34 financial statements. For the year ended June 30, 2007, MTC adopted GASB Statement No. 46, *Net Assets Restricted by Enabling Legislation*, an amendment to GASB Statement No. 34, which clarifies and modifies the reporting requirements related to the restriction of net assets resulting from enabling legislation.

GASB Statement No.42, *Accounting and Financial Reporting for Impairment of Capital Assets and for Insurance Recoveries*, which establishes accounting and financial reporting standards for impairment of capital assets as well as GASB Statement No. 47, *Accounting for Termination Benefits*, which provides guidance on how employers should account for benefits associated with either voluntary or involuntary terminations have been adopted by MTC for fiscal year ended June 30, 2006.

The adoption of the above pronouncements did not have a material effect on the financial statements of MTC.

# Metropolitan Transportation Commission

## Financial Statements for the years ended June 30, 2007 and 2006

### Notes to Financial Statements

---

With respect to the business-type activities of MTC and as required under GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that Use Proprietary Fund Accounting*, MTC continues to apply all applicable GASB pronouncements as well as Financial Accounting Standards Board (FASB) Statements and Interpretations, Accounting Principles Board (APB) Opinions and Accounting Research Bulletins (ARBs) of the Committee on Accounting Procedure issued on or before November 30, 1989, unless those pronouncements conflict or contradict GASB pronouncements. MTC has elected under GASB Statement No. 20 not to apply all FASB Statements and Interpretations issued after November 30, 1989, due to the governmental nature of MTC's operations.

MTC adopted GASB Statement No. 45, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, which provides guidance on how state and local governments should account for and report costs and obligations associated with postemployment healthcare and other nonpension benefits commonly referred to as other postemployment benefits or OPEB. For additional information, see Note 9.

GASB Statement No. 48, *Sales and Pledges of Receivables and Future Revenues and Intra-Entity Transfers of Assets and Future Revenues*, which establishes criteria to ascertain whether proceeds derived from an exchange of an interest in expected cash flows from specific receivables or specific future revenues for immediate cash payments be reported as revenue or as a liability, has been adopted for fiscal year ended June 30, 2007 and applied to BATA. The adoption of this pronouncement did not have a material effect on the financial statements.

GASB Statement No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*, which provides guidance on the accounting and reporting of obligations and costs related to existing pollution remediation, the requirements of which are effective for financial statements for periods beginning after December 15, 2007. This statement is not expected to have a material impact on the financial statements of MTC.

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund financial statements. Revenues are recorded when earned and expenses are recorded when incurred, regardless of the timing of related cash flows.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Under the modified accrual basis of accounting, revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectable within the current period or 30 days after to pay liabilities of the current period. All revenue sources included in the governmental funds, namely federal, state and local grants as well as sales tax revenue, utilize this revenue recognition methodology.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

MTC reports the following governmental funds:

The *general fund* is used to account for those financial resources that are not required to be accounted for in another fund. MTC's general fund is its primary operating fund.

*Special revenue funds* are used to account for proceeds of specific revenue sources, other than major capital projects, that are legally restricted to expenditures for specified purposes. MTC's special revenue funds include the AB 664 Net Toll Revenue Reserves Fund, the STA Fund, the Transit Reserve Fund, the Rail Extension Reserve Fund, the Exchange Fund, the Feeder Bus Fund and the BART Car Exchange Fund, which is new for fiscal 2007.

In fiscal 2007, the following funds are considered nonmajor special revenue funds: the Transit Reserve Fund, the Rail Extension Reserve Fund, the Exchange Fund, the Feeder Bus Fund and the BART Car Exchange Fund. Since these funds did not meet the major fund test, management has included them in Other Governmental Funds. The individual funds are presented in Schedules 1 and 2 for fiscal 2007.

The opening fund balance of the combined non-major special revenue funds is as follows:

	<b>Opening Balance</b> <b><u>2007</u></b>
Transit Reserve Fund	\$ 441,125
Rail Extension Reserve Fund	7,488,632
Exchange Fund	10,425,453
Feeder Bus Fund	44,608
BART Car Exchange	<u>0</u>
Total	<u><u>\$18,399,818</u></u>

The *capital projects fund* is used to account for the financial resources used in the acquisition and development of major capital projects. There are two projects included in this fund in fiscal 2007 – the TransLink<sup>®</sup> project and the Fund Management Project.

In fiscal 2007 and 2006, the following funds are considered major governmental funds: MTC General Fund, AB 664 Net Toll Revenue Reserves Fund, STA Fund, and Capital Projects. The balance sheet and statements of revenues, expenditures and changes in fund balances and budget to actual statements of revenues and change in fund balances are presented for these funds.

MTC reports the following major proprietary funds:

The *Bay Area Toll Authority (BATA) fund* is used to account for the activities of BATA with responsibilities for the disposition of toll revenues collected from toll bridges owned

# Metropolitan Transportation Commission

## Financial Statements for the years ended June 30, 2007 and 2006

### Notes to Financial Statements

---

and operated by the state in the San Francisco Bay Area. BATA is a blended component unit of MTC.

The *MTC Service Authority for Freeways and Expressways (SAFE) fund* is used to account for the activities of MTC SAFE with responsibilities for administering a freeway motorist aid system in the participating counties as well as providing tow truck services to stranded motorists. MTC SAFE is a blended component unit of MTC.

MTC reports the following discretely presented component unit:

The *Bay Area Infrastructure Financing Authority (BAIFA) fund* is used to account for the activities of BAIFA with the financing of debt backed by assigned revenue from BATA. The fund also reimburses BATA for its expenses from seismic projects.

Additionally, MTC reports the following fiduciary funds to account for assets held by MTC in a trustee capacity or as an agent. These agency funds are custodial in nature and do not have a measurement of results of operations. They are on the accrual basis of accounting.

The *AB 1107 fund* is used to account for the activities of the AB 1107 Program. AB 1107 funds are sales tax revenue collected under the ordinance adopted pursuant to Section 29140 of the Public Utilities Code. These funds are administered by MTC for allocation to the Alameda-Contra Costa Transit District (AC Transit) and the City and County of San Francisco for its municipal railway system (MUNI) on the basis of regional priorities established by the MTC.

The *Transportation Development Act (TDA) Program fund* is used to account for the activities of the TDA Program. In accordance with state regulations and memoranda of understanding with operators and local municipalities, MTC is responsible for the administration of sales tax revenue derived from the TDA.

#### **D. Budgetary Accounting**

Enabling legislation and adopted policies and procedures provide that MTC approve an annual budget by June 30 of each year. Annual budgets are adopted on a basis consistent with accounting principles generally accepted in the United States of America for all governmental and proprietary funds. MTC also approves a life of project budget whenever new capital projects are approved. MTC presents a preliminary budget in May. The final budget is presented in June. MTC conducts hearings for discussion of the proposed annual budget and at the conclusion of the hearings, but not later than June 30, adopts the final budget for the following fiscal year. The appropriated budget is prepared by fund, project and expense type. The legal level of control is at the fund level and the governing body must approve additional appropriations. Budget amendments are recommended when needed. Operating appropriations lapse at fiscal year-end.

MTC employs the following practices and procedures in establishing budgetary data as reflected in the basic financial statements:

# Metropolitan Transportation Commission

## Financial Statements for the years ended June 30, 2007 and 2006

### Notes to Financial Statements

---

- Annual budgets are adopted on the modified accrual basis of accounting for governmental fund types. These include the general fund, plus major and non-major special revenue funds. Capital budgets are adopted on a project life-to-date basis.
- Annual budgets are adopted on the accrual basis for the proprietary fund types.

#### **E. Encumbrances**

Encumbrance accounting is employed in the general and special revenue funds. Under this method, purchase orders, contracts, memoranda of understanding and other commitments outstanding at year-end are reported as reservations of fund balances since they do not constitute expenditures or liabilities. These commitments will be recognized in subsequent year appropriations.

#### **F. Cash and Investments**

MTC applies the provisions of GASB Statement No. 31, *Accounting and Financial Reporting for Certain Investments and External Investment Pools*, which requires certain investments (generally investments in interest earning investment contracts, external investment pools, open ended mutual funds, debt securities, and equity securities) to be recorded at fair value with the difference between cost and fair value recorded as an unrealized gain or loss. Investments are stated at fair value based upon quoted market prices. Net increases or decreases in the fair value of investments are shown in the Statements of Revenues, Expenditures and Changes in Fund Balance for all governmental fund types and in the Statements of Revenues, Expenditures and Changes in Net Assets for the proprietary funds.

MTC invests its available cash under the prudent investor rule. The prudent investor rule states, in essence, that “in investing ... property for the benefit of another, a trustee shall exercise the judgment and care, under the circumstance then prevailing, which people of prudence, discretion, and intelligence exercise in the management of their own affairs ... .” This policy affords the MTC a broad spectrum of investment opportunities as long as the investment is deemed prudent and is authorized under the California Government Code Sections 53600, et seq. Investments may be made within the following approved instrument guidelines:

- Securities of the U.S. Government or its agencies
- Securities of the State of California or its agencies
- Certificates of deposit (or time deposits) placed with commercial banks and savings and loans
- Bankers’ acceptances
- Authorized pooled investment programs
- Commercial paper – Rated “A1 or P1”
- Corporate notes – Rated “A” or better
- Municipal bonds
- Mutual funds – Rated “AAA”
- Asset backed securities

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

- Other investment types authorized by state law and not prohibited in the MTC investment policy

***Cash and Cash Equivalents***

For the purpose of the Statement of Cash Flows, MTC considers all highly liquid investments with a maturity of three months or less at date of purchase to be cash and cash equivalents. Deposits in the investment pool of the County of Alameda are presented as cash and cash equivalents as they are available for immediate withdrawal and there is no risk of loss of principal.

***Restricted Cash***

Certain cash is restricted as these assets are either advances used for a specific purpose with the balance being refunded upon project completion, prepaid customer deposits for the FasTrak<sup>®</sup> program, or funds restricted for debt service.

***Restricted Investments***

Certain investments are classified as restricted on the Statement of Net Assets because their use is limited externally by applicable bond covenants, laws or regulations or there exists an imposed restriction through enabling legislation.

**G. Capital Assets**

Capital assets, which include buildings and improvements, office furniture and equipment, leased equipment, automobiles and call boxes, are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital asset acquisitions are recorded at historical cost. Depreciation expense for the governmental activities is charged against general government function.

Capital assets are defined as assets with an initial, individual cost of more than \$5,000 and an estimate useful life in excess of three years.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Depreciation is computed using the straight-line method that is based upon the estimated useful lives of individual capital assets. The estimated useful lives of capital assets are as follows:

	<u>Years</u>
Buildings and improvements	10 - 45
Office furniture and equipment	3 - 10
Leased equipment	5
Automobiles	3
Call boxes	10

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

**H. Net Assets**

Net assets represent residual interest in assets after liabilities are deducted. Net assets consist of three sections: Invested in capital assets, net of related debt, as well as restricted and unrestricted. Net assets are reported as restricted when constraints are imposed by third parties or enabling legislation. Restricted net assets consist of amounts restricted for capital expenditures and other purposes as follows:

	2007	2006
Restricted for Capital Projects	<u>\$ 99,693,883</u>	<u>\$ 47,659,740</u>
Other Purposes:		
RM 2 program reserve	159,260,022	66,127,649
Seismic program reserve	357,474,498	378,167,638
Debt covenant - operating & maintenance reserve	125,000,000	125,000,000
Debt covenant - reserve fund	-	24,148,268
Self insurance reserve	50,000,000	50,000,000
Long-term receivable restricted for use		
by rail reserve	48,410,000	57,000,000
Other	<u>9,130,266</u>	<u>12,456,841</u>
Total Other Purposes	<u>\$ 749,274,786</u>	<u>\$ 712,900,396</u>

**I. Retirement Plans**

MTC provides a defined benefit pension plan, the Miscellaneous Plan of Metropolitan Transportation Commission (the "Plan") which provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. The Plan is part of the Public Agency portion of the California Public Employees' Retirement System (CalPERS), an agent multiple-employer plan administered by CalPERS, which acts as a common investment and administrative agent for participating public employers in the State.

**J. Postemployment Healthcare Benefits**

MTC pays certain health care insurance premiums for retired employees. Employees may become eligible for these benefits if they reach normal retirement age while working for the MTC. The number of participants eligible to receive benefits was 49 for the year ended June 30, 2007.

For the year ended June 30, 2007, MTC adopted GASB Statement No. 45, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, which provides guidance on how state and local governments should account for and report costs and obligations associated with postemployment healthcare and other nonpension benefits commonly referred to as other postemployment benefits or OPEB. In accordance with the adoption of GASB Statement No. 45, the cost of retiree health care insurance premiums of

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

\$353,378 for fiscal year 2007 have been applied toward the annual required contribution (ARC) of \$2,155,931 for fiscal year 2007. See Note 9 for additional information.

**K. Compensated Absences**

MTC's regular staff employees accumulate vacation pay and sick leave pay based on the agreement with the Committee for Staff Representation pursuant to the Meyers-Milias-Brown Act. A liability exists for accumulated vacation and sick leave. The compensated absences liability presented in the government-wide governmental activities totals \$2,579,698 and \$2,269,381 at June 30, 2007 and 2006, respectively. Unused accumulated sick and vacation leave is paid at the time of employment termination up to a maximum of 240 hours for sick leave as well as the total accumulated vacation leave per employee from the general fund.

A summary of changes in compensated absences for the year ended June 30, 2007 is as follows:

	<b>Beginning Balance July 1, 2006</b>	<b>Additions</b>	<b>Reductions</b>	<b>Ending Balance June 30, 2007</b>	<b>Due Within One Year</b>
Compensated Absences	\$2,269,381	\$1,807,481	\$ (1,497,164)	\$ 2,579,698	\$ 1,224,129
Total Compensated Absences	<u>\$2,269,381</u>	<u>\$1,807,481</u>	<u>\$ (1,497,164)</u>	<u>\$ 2,579,698</u>	<u>\$ 1,224,129</u>

A summary of changes in compensated absences for the year ended June 30, 2006 is as follows:

	<b>Beginning Balance July 1, 2005</b>	<b>Additions</b>	<b>Reductions</b>	<b>Ending Balance June 30, 2006</b>	<b>Due Within One Year</b>
Compensated Absences	\$2,035,441	\$1,576,300	\$ (1,342,360)	\$ 2,269,381	\$ 1,064,694
Total Compensated Absences	<u>\$2,035,441</u>	<u>\$1,576,300</u>	<u>\$ (1,342,360)</u>	<u>\$ 2,269,381</u>	<u>\$ 1,064,694</u>

**L. Pledged Revenue to Bay Area Infrastructure Financing Authority**

In December 2006, BATA entered into a contribution agreement with the state of California whereby BATA pledged to transfer the state's future scheduled payments designated for the Toll Bridge Seismic Retrofit Program to the Bay Area Infrastructure Financing Authority (BAIFA). BAIFA issued \$972,320,000 of bonds called State Payment Acceleration Notes (SPANs) collateralized solely by BATA's pledge of state payments. BAIFA agreed to apply the proceeds from the SPANs for the costs of issuance and for the seismic retrofit program. The scheduled payments are identified and authorized by state statutes. State payments pledged by BATA total \$1,135,000,000. Pledged state payments are scheduled from fiscal years 2007 to 2014. In the contribution agreement, BATA has pledged and assigned to BAIFA all BATA's rights to the future state payments.

# **Metropolitan Transportation Commission**

## **Financial Statements for the years ended June 30, 2007 and 2006**

### **Notes to Financial Statements**

---

In fiscal year 2007, the amount of pledged payments from the state to BAIFA was \$125,000,000. SPAN proceeds distributed to BATA were \$514,387,836.

The accounting for the above transactions are prescribed by GASB Statement 48 which establishes criteria to ascertain whether proceeds derived from an exchange of an interest in expected cash flows from specific receivables or specific future revenues for immediate cash payments be reported as revenue or as collateralized borrowing. The requirements of GASB Statement No. 48 are effective for financial statements for periods beginning after December 15, 2006. BATA has adopted this pronouncement early for fiscal 2007 and as a result has reported the exchange of the SPAN proceeds for the interest in expected future cash flow from Caltrans as collateralized borrowing by BATA and a receivable by BAIFA.

#### **M. Unearned Revenue**

The unearned revenue in BATA represents the funds collected by the Regional Customer Service Center (RCSC) that are prepayments for tolls or represents a deposit from patrons. The patrons are issued transponders with the prepaid amounts for usage against tolls on the California bridges. Patrons are required to contribute a deposit if they pay by check.

#### **N. Toll Revenues Collected by Caltrans**

After toll revenues are collected by Caltrans and transferred to BATA at the toll plazas, BATA accounts for the cash collection from the operation of the bridges and transfers revenues for the seismic retrofit charges to Caltrans. After the bond defeasance in April 2006, the revenue for the seismic retrofit charges also remained with BATA. This revenue is used for the seismic retrofit program. BATA recognizes toll revenue as amounts are earned from vehicle utilization of the toll bridges.

#### **O. Operating Expenditures Incurred by Caltrans**

In accordance with the Cooperative Agreement between BATA and Caltrans, BATA reimburses Caltrans for certain costs incurred for bridge operating expenditures. These expenses include maintenance, administration and operations costs.

#### **P. Distributions to Caltrans for Their Capital Purposes**

In accordance with the Cooperative Agreement between BATA and Caltrans, BATA reimburses Caltrans for bridge capital expenses. Expenses are reflected to the extent Caltrans bills are presented to MTC that relate to the period through the end of the fiscal year.

#### **Q. Contribution From Caltrans**

As provided by the Assembly Bill (AB) 144 and in accordance with the Cooperative Agreement between BATA and Caltrans, Caltrans has transferred to BATA a portion of the revenues and existing fund balances collected on or before April 25, 2006. The transfer was \$462,951,481 in cash. A receivable of \$36,451,759 was received in early fiscal 2007.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

In fiscal 2007, Caltrans transferred the remaining balance of \$1,234,760 in cash to BATA.

**R. Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

**S. Operating and Non-operating Revenues and Expenses**

Operating revenues are those necessary for principal operations of the entity. Operating expenses are those related to user service activities. Non-operating revenues and expenses are all others revenues and expenses not related to user service activities.

**2. UNRESTRICTED ASSET DEFICIT**

The unrestricted asset deficit arises due to the nature of the activities of BATA. BATA is responsible for providing Caltrans funding for bridge repairs related to the seven state-owned bridges. Expenses related to these payments to Caltrans are treated as expenses of BATA as BATA does not own or maintain title to the bridges. The deficit will be reduced through operating income earned in the future.

**3. CASH, CASH EQUIVALENTS AND INVESTMENTS**

A reconciliation of Cash, Cash Equivalents and Investments as shown on the Statement of Net Assets for all funds at June 30, 2007 and 2006 is as follows:

	<b>2007</b>	<b>2006</b>
Cash and cash equivalents	\$ 415,848,708	\$ 391,433,547
Investments	<u>2,498,055,579</u>	<u>1,650,896,328</u>
Total cash, cash equivalents and investments	<u>\$2,913,904,287</u>	<u>\$2,042,329,875</u>
Reported as:		
Unrestricted cash and cash equivalents	\$ 788,826,711	\$ 721,156,267
Unrestricted investments	<u>1,249,618,267</u>	<u>1,088,320,134</u>
Total unrestricted cash, cash equivalents and investments	<u>2,038,444,978</u>	<u>1,809,476,401</u>

Corporate Bonds	25,000,000	-
Local Agency Investment Fund	<u>292,923</u>	<u>278,548</u>
Total investments	<u>2,498,055,579</u>	<u>1,650,896,328</u>
Total cash, cash equivalents and investments	<u>\$ 2,913,904,287</u>	<u>\$ 2,042,329,875</u>

MTC holds a position in the investment pool of County of Alameda in the amount of \$93,948,193. These funds in the Alameda County pool are not registered with the Securities and Exchange Commission (SEC). The County of Alameda is restricted by state code in the types of investments it can make. Further, the County Treasurer has a written investment policy approved by the Board of Supervisors and also has an investment committee which performs regulatory oversight for its pool as required by California Government Code Section 27134. The County's investment policy authorizes the County to invest in obligations of the U.S. Treasury, its agencies and instrumentalities, certificates of deposit, commercial paper rated A-1 by Standard & Poor's Corporation or P-1 by Moody's Commercial Paper Record, banker's acceptances, repurchase agreements, reverse repurchase agreements, and the State Treasurer's investment pool. The fair value in the investment pool of County of Alameda is the same as the fair value of the position in the external investment pool at June 30, 2007. The investment holdings with the County of Alameda account for 3 percent of MTC's investment portfolio. Deposits with the County of Alameda are highly liquid and there is no risk of loss of principal and as such are considered to be cash and cash equivalents.

MTC holds \$292,923 in the Local Agency Investment Fund (LAIF). MTC's investment policy allows investment in LAIF as authorized by Government Code section 16429. LAIF is a program created by statute as an investment alternative for California's local governments and special districts. LAIF investments account for 0.01 percent of MTC's investment portfolio.

MTC's portfolio includes five mutual fund investments. The mutual funds are Cadre Institutional Investors Trust (Cadre), Blackrock Treasury Trust Mutual Fund, Columbia

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

Treasury Reserve Fund, Dreyfus Treasury Cash Management Fund, and Blackrock T Fund. The mutual fund investments in MTC's investment portfolio are expressed as a percentage of MTC's total cash and investment as follows:

	2007	2006
Highmark	0%	7%
Cadre	1%	1%
Columbia Treasury	1%	1%
Dreyfus	1%	1%
Blackrock T Fund	1%	1%
Blackrock Treasury Trust	2%	n/a

Cadre is owned by Public Financial Management and is rated "AAA" by both Standard & Poor's Corporation and Moody's. The fund invests in debt securities issued or guaranteed by the U.S. government or an agency of the U.S. government and repurchase agreements collateralized by US government securities.

The Blackrock Treasury Trust Mutual Fund is part of the overnight sweep fund utilized by Union Bank of California (UBOC) custodial accounts and invests primarily in U.S. Treasury, such as Treasury bills, notes and trust receipts. The fund is rated "AAA" by both Standard & Poor's and Moody's.

The Blackrock T Fund is part of the overnight sweep fund utilized by UBOC trust accounts and invests primarily in money market instruments including U.S. Treasury bills, notes, obligations guaranteed by the U.S. Treasury and repurchase agreements fully collateralized by such obligations. The fund is rated "AAA" by both Standard & Poor's and Moody's.

Dreyfus Treasury Cash Management fund is part of the overnight sweep fund utilized by Bank of New York custodial accounts and invests exclusively in securities issued or guaranteed by the U.S. government and repurchase agreements fully collateralized by such obligations. The fund is rated "AAA" by both Standard & Poor's and Moody's.

Columbia Treasury Reserve funds are part of the overnight sweep fund utilized by Bank of America checking accounts and invests exclusively in U.S. Treasury obligations and repurchase agreements secured by U.S. Treasury obligations. The fund is rated "AAA" by both Standard & Poor's and Moody's.

State law and MTC policy limit mutual fund investment to 20 percent of the portfolio, with no more than 10 percent of the portfolio in any single fund. All the mutual fund holdings are highly liquid and there is no risk of loss of principal and as such they are considered to be cash and cash equivalents.

The government-sponsored enterprise (GSE) holdings carry "AAA" ratings. Neither State law nor MTC policy imposes a limit to the amount of GSE within the portfolio. The holdings include Federal Home Loan Board (FHLB) and Federal Home Loan Mortgage (FHLMC).

## **Financial Statements for the years ended June 30, 2007 and 2006**

### **Notes to Financial Statements**

---

MTC holds a position in corporate notes as permitted under MTC's investment policy. Corporate notes must be rated "A" or better with a maximum maturity of 5 years and cannot exceed 10 percent of the investment portfolio. As of June 30, 2007, MTC holds \$25,000,000 in corporate notes. The corporate notes constitute 1 percent of MTC's total investment holdings.

MTC holds positions in both commercial paper and certificates of deposits as permitted under MTC's investment policy. Commercial paper must have the highest letter and numerical rating provided by Standard & Poor's and Moody's. Eligible commercial paper is further limited to issuing corporations organized and operating in the United States and having total assets of \$500,000,000 and having an "A" or higher rating for issuer's debt, other than commercial paper. Purchases cannot exceed 180 days maturity, 10 percent of the outstanding paper of a single issuing corporation and 10 percent of the agency's investment portfolio. As of June 30, 2007, MTC holds \$26,458,016 (market value) in commercial paper. The commercial paper investments constitute 1 percent of MTC's total investment holdings.

Certificates of Deposits (CDs) must be issued by a nationally chartered or state-chartered bank and cannot exceed 10 percent of the investment portfolio. As of June 30, 2007, MTC holds \$75,001,309 (market value) in negotiable CDs. The CDs constitute 3 percent of MTC's total investment holdings.

MTC also has \$1,010,177 cash restricted for costs for the Express Bus purchases funded with the Traffic Relief Program funds. BATA has restricted cash of \$35,171,456 for the FasTrak<sup>®</sup> program, funded with patron holders funds for the Electronic Toll Collection (ETC) program.

#### **A. Deposit and Investment Risk Factors**

There are many factors that can affect the value of investments. MTC invests substantially in fixed income securities, which are affected by credit risk, custodial credit risk, concentration of credit risk, and interest rate risk.

##### **i.) Credit Risk**

Fixed income securities are subject to credit risk, which is the possibility that the security issuer will fail to pay interest or principal in a timely manner, or that negative perceptions of the issuer's ability to make these payments will cause security prices to decline. The circumstances may arise due to a variety of factors such as financial weakness, bankruptcy, litigation and/or adverse political developments.

A bond's credit quality is an assessment of the issuer's ability to pay interest on the bond, and ultimately, to pay the principal. Credit quality is evaluated by at least one nationally recognized independent credit-rating agencies, for example Moody's Investor Services or Standard & Poor's. The lower the rating, the greater the chance (in the opinion of Moody's or Standard & Poor's) that the bond issuer will default, or fail to meet its obligations.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

**ii.) Custodial Credit Risk**

Custodial credit risk is the risk that in the event of the failure of the custodian, the investments may not be recovered. All securities are held in independent safekeeping accounts maintained with Union Bank of California (UBOC) and Bank of New York (BONY) and held in the name of MTC. All security trades clear through both banks. All checking and sweep accounts are fully insured or collateralized. As a result, custodial credit risk is remote.

**iii) Concentration of Credit Risk**

Concentration of credit risk is the risk associated with lack of diversification, such as having substantial investments in a few individual issuers, thereby exposing the organization to greater risks resulting from adverse economic, political, regulatory or credit developments.

Investments in issuers that represent 5 percent or more of total cash and investments at June 30, 2007 and 2006 are as follows:

	<b>2007</b>	<b>2006</b>
Federal Home Loan Board (FHLB)	29%	24%
Federal Home Loan Mortgage (FHLMC)	50%	44%

**iv) Interest Rate Risk**

Interest rate risk is the risk that the market value of fixed-income securities will decline because of rising interest rates. The prices of fixed-income securities with a longer time to maturity, measured by duration in years, tend to be more sensitive to changes in interest rates and, therefore, more volatile than those with shorter durations. MTC's policy is to buy and hold investments to maturity.

MTC holds \$45 million in investments tied to floating rate benchmarks. Depending on the structure, the rate on the investment will reset monthly or quarterly and is based on a LIBOR (London Interbank Offering Rate) or a CMT (Constant Maturity Treasuries-2 year TSY) index.

In addition to the floating rate investments in the portfolio, MTC also holds \$15 million in investments with step-up coupon features. The coupon will step up or increase after a period of time has elapsed.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

The floating rate and step-up coupon securities are summarized as follows:

Investment	Par Value	Structure	Final Maturity
FHLMC	\$20 million	1 month LIBOR + 8 basis points to 10/07 Fixed at 5.15% from 10/07 to maturity	4/09
FHLB	\$10 million	Previous coupon reset + 25 basis points Initial index – 3 months LIBOR	3/08
FHLMC	\$15 million	Fixed at 4% the first year (to 7/06) Steps to 4.5% the second year (to 7/07) Steps to 5% the third year	7/08
MBIA	\$15 million	3 month LIBOR + 20 basis points to 3/07 2-year CMT + 20 basis points from 3/07 to maturity	9/08

The weighted average maturity of MTC's Government Sponsored Enterprise (GSE) securities (expressed in number of years) at June 30, 2007 and 2006 are as follows:

	2007	2006
Government-sponsored enterprises		
Federal Home Loan Board	0.30	0.81
Federal Home Loan Mortgage	0.56	0.85
Federal National Mortgage Association	5.82	6.82
Tennessee Valley Authority	3.56	4.56
Federal Farm Credit Board	0.22	2.31

Corporate notes have a maturity of slightly over one year with a weighted average of 379 days.

Commercial paper and certificates of deposits have maturities of less than 1 year. The weighted average maturity for commercial paper is 36 days and the weighted average maturity for certificates of deposits is 73 days. Interest rate risk is considered to be minimal for these types of securities.

## Metropolitan Transportation Commission Financial Statements for the years ended June 30, 2007 and 2006 Notes to Financial Statements

---

- (1) 2001 Series A, B and C bonds are issued as variable rate demand bonds with a floating-to-fixed interest rate swap transaction in place. Refer to interest rate swap description within this footnote.
- (2) 2001 Series D bonds are issued as fixed rate bonds with a final maturity of 2018. The bonds carry interest rates ranging from 4.0% in 2006 to 5.0% in 2018, or an all in true interest cost of 4.86%.
- (3) 2003 Series A and B bonds are issued as variable rate demand bonds with a floating-to-fixed interest rate swap transaction in place. Refer to interest rate swap description within this footnote.
- (4) Of the \$150,000,000 2003 Series C revenue bonds, \$50,000,000 are issued as variable rate demand bonds with a floating to fixed interest rate swap. Refer to interest rate swap description within this footnote.
- (5) 2004 Series A, B and C bonds are issued as variable rate demand bonds with a floating-to-fixed interest rate swap transaction in place. Refer to interest rate swap description within this footnote.
- (6) 2006 Series A-E bonds are issued as variable rate demand bonds with a total of 4 floating-to-fixed interest rate swap transaction in place. The blended swap rate for this 2006 series is 3.73%. Refer to interest rate swap description within this footnote.
- (7) 2006 Series F bonds are issued as fixed rate bonds with a final maturity of 2031. The bonds carry interest rates ranging from 3.4% in 2007 to 5.0% in 2031, or an all in true interest cost of 4.59%.
- (8) 2007 Series A-E, and G bonds are issued as variable rate demand bonds. There are 4 floating to fixed interest rate swaps with an effective date of November 1, 2007 for the series. Refer to interest rate swap description within this footnote.
- (9) 2007 Series F bonds are issued as fixed bonds with a final maturity of 2031. The bonds carry interest rates ranging from 4% in 2008 to 5% in 2031 with an all in true interest rate cost of 4.44%.
- (10) Amount issued includes 2001 Series D refunding of \$61,415,000 (maturities 2012-2018)
- (11) Net of Deferred charge on 2001 Series D bond refunding of \$2,256,715 less 2007 amortization of \$25,644
- (12) 2006 Bay Area Infrastructure Financing Authority SPANs were issued as fixed rate bonds with a final maturity of 2017. The bonds carried interest rates ranging from 4.0% in 2007 to 5.0% in 2017, or an all-in true interest cost of 4.27%

# Metropolitan Transportation Commission Financial Statements for the years ended June 30, 2007 and 2006 Notes to Financial Statements

A summary of changes in long-term debt for the year ended June 30, 2006 is as follows:

Business-type activities		Issue Date	Interest Rate	Calendar Maturity Year	Original Amount	Beginning Balance July 1, 2005	Additions	Reductions	Ending Balance June 30, 2006	Due Within One Year
2001 Revenue Bond Series A	5/24/2001	4.09%-4.10%	(1)	2036	\$ 150,000,000	\$ 150,000,000	\$ -	\$ -	150,000,000	\$ -

					\$ 3,149,205,000	\$ 1,000,000,000	\$ 2,149,205,000	\$ 5,785,000	\$ 3,143,420,000	\$ 29,705,000
Unamortized bond premium						1,077,069	-	83,929	993,140	
Net long-term debt as of June 30, 2006						\$ 1,001,077,069	\$ 2,149,205,000	\$ 5,868,929	\$ 3,144,413,140	

(1) 2001 Series A, B and C bonds are issued as variable rate demand bonds with a floating-to-fixed interest rate swap transaction in place. Refer to interest rate swap description within this footnote.  
 (2) 2001 Series D bonds are issued as fixed rate bonds with a final maturity of 2018. The bonds carry interest rates ranging from 4.0% in 2006 to 5.0% in 2018, or a true interest cost of 4.83%.

(3) 2003 Series A and B bonds are issued as variable rate demand bonds with a floating-to-fixed interest rate swap transaction in place. Refer to interest rate swap description within this footnote.  
 (4) Of the \$150,000,000 2003 Series C revenue bonds, \$50,000,000 are issued as variable rate demand bonds with a floating to fixed interest rate swap transaction in place. The remaining \$100,000,000 are issued as floating rate bonds with a final maturity of 2038. Interest rates in the variable rate demand bond averaged 2.93% as of June 30, 2006.

(5) 2004 Series A, B and C bonds are issued as variable rate demand bonds with a floating-to-fixed interest rate swap transaction in place. Refer to interest rate swap description within this footnote.  
 (6) 2006 Series A-E bonds are issued as variable rate demand bonds with a total of 4 floating-to-fixed interest rate swap transaction in place. The blended swap rate for this 2006 series is 3.73%.  
 Refer to interest rate swap description within this footnote.

(7) 2006 Series F bonds are issued as fixed rate bonds with a final maturity of 2031. The bonds carry interest rates ranging from 3.4% in 2007 to 5.0% in 2031, or a true interest cost of 4.58%.

**Toll Revenue Bonds**

The Bay Area Toll Authority Bridge Toll Revenue Bonds are payable solely from "Pledged Revenues." The Master Indenture, dated as of May 1, 2001 defines Pledged Revenues as all bridge toll revenue as well as revenue and all amounts held by the Trustee in each fund and account established under the indenture except for amounts in the Rebate Fund and amounts on deposit in any fund or account established to hold the proceeds of a drawing on any Liquidity Instrument.

# **Metropolitan Transportation Commission**

## **Financial Statements for the years ended June 30, 2007 and 2006**

### **Notes to Financial Statements**

---

In the fifth supplemental indenture dated February 2006, BATA covenanted to maintain toll revenue at levels that result in net operating revenue greater than 1.2 times annual debt service costs as defined in the master indenture dated May 1, 2001. In addition, BATA has agreed to maintain tolls at a level where net operating revenue plus the balance in the operations and maintenance charges is at least 1.25 times total “fixed costs” as well as maintaining tolls at levels exceeding 1.0 times all fixed costs as costs are defined in this indenture.

BATA has also covenanted in the 2001 Indenture that no additional bonds shall be issued, unless the additional bonds are issued for refunding of 2001 Series bond purposes, or Net Revenue equates to greater than 150 percent of the combined maximum annual debt service, including the 2001 bonds and additional bonds.

BATA has covenanted to maintain an operations and maintenance reserve of two times the adopted operations and maintenance budget. At June 30, 2007, BATA had restricted \$125 million as the restricted operations. These amounts are shown as restricted investments for the year ended June 30, 2007. BATA has also covenanted to maintain an emergency extraordinary loss reserve of not less than \$50 million. In addition, the BATA board has authorized the reserves of \$600 million for emergency extraordinary loss reserves and \$70 million for a bridge rehabilitation reserve.

The bonds issued by BATA are collateralized by a first lien on all revenues and are not an obligation of the MTC primary government or any component unit other than BATA.

In May 2007, BATA issued the 2007 Series A-G Bonds in the principal amount of \$810,950,000, with a premium of \$21,232,527. Part of the proceeds from the 2007 Series F Bonds, \$63,844,361, was deposited in an escrow fund held by the Trustee and applied to the defeasance and eventual redemption on April 1, 2011 of \$61,415,000 outstanding principal amount of BATA’s San Francisco Bay Area Toll Bridge Revenue Bonds, 2001 Series D, maturing on April 1, 2012 through April 1, 2018. The difference between the reacquisition price and the net carrying amount of the old debt is \$2,256,715 which is reported as a deferred charge. The current year amortization of the deferred charge is \$25,644 leaving an ending balance of \$2,231,071. The transaction resulted in a reduction of debt service payments over the next 11 years of \$2,776,348 and provided an economic gain of \$2,227,336.

#### **Component Unit – BAIFA**

The State Payment Acceleration Notes (SPANs) are payable solely from “Pledged Revenues.” The Indenture of Trust, dated December 1, 2006, defines Pledged Revenues as all scheduled payments allocated by the California Transportation Commission (CTC), as well as revenue and all amounts held by the Trustee in each fund and account established under the indenture.

The SPANs issued by BAIFA do not constitute debt or liability of the State, MTC, or BATA or any other political subdivisions of the State other than BAIFA. More information is presented in Note L.

#### **Interest Rate and Forward Interest Rate Swap Agreements**

In January 2002, BATA completed a variable fixed rate swap transaction with a notional amount of \$300 million. Counterparties to the transaction are Ambac for \$150 million, Citigroup for \$75 million and Morgan Stanley for \$75 million. During the 34-year term of the swap, BATA will pay each respective counterparty based on a fixed rate ranging from 4.09 percent to 4.12 percent while receiving a variable rate payment based on 65 percent of the one-month LIBOR index. The variable rate bonds associated with this swap were issued as part of BATA's 2001 \$300 million Toll Bridge Revenue Bond issue.

BATA completed a contract with Ambac to swap variable-to-fixed rate bonds with a notional amount of \$200 million. The contract calls for BATA to pay Ambac a fixed rate of 4.139 percent with an effective date of March 2003. In exchange, BATA will receive a variable rate payment based on 65 percent of the one-month LIBOR rate for 35 year term of the 2003 financing. The variable rate bonds associated with this swap (\$75 million for Series A, \$75 million for Series B, and \$50 million for Series C) were issued as part of BATA's 2003 \$300 million Toll Bridge Revenue Bond issue.

In August 2004, BATA completed a contract with Ambac to swap variable-to-fixed rate bonds with a notional amount of \$300 million with an effective date of October 2004. The contract calls for BATA to pay Ambac a fixed rate of 3.416 percent. In exchange, BATA will receive a variable rate based on 54 percent of the one-month LIBOR rate and 54 basis points for 35 year term of the 2004 financing. The variable rate bonds associated with this swap were issued as part of BATA's 2004 \$300 million Toll Bridge Revenue Bond issue.

In November 2005, BATA approved a forward contract to swap variable-to-fixed rate bonds with a notional amount of \$1 billion with an effective date of February 2006. Counterparties to the transactions are Ambac for \$500 million, JP Morgan AAA ISDA for \$245 million, Citibank for \$225 million and Bank of America for \$30 million. During the 39 year-term of the swap, BATA will pay each respective counterparty based on a fixed rate ranging from 3.63 percent to 4.00 percent. In exchange, BATA will receive a variable rate payment based on varying percentages of LIBOR.

BATA will receive from Ambac and Bank of America a variable rate payment based on 68 percent of the one-month LIBOR rate. BATA will receive from Citibank a variable rate payment based on 53.8 percent of the one-month LIBOR rate and 74 basis points. BATA will receive from JP Morgan a variable rate payment based on 67.8 percent of the 10 year LIBOR rate in years 1 through 30 (first leg) and a variable rate payment based on 75.105 percent of the one-month LIBOR in years 31 through 39 (second leg).

The variable rate bonds associated with this swap were issued as part of BATA's 2006 \$1 billion Toll Bridge Revenue Bond issuance.

On November 30, 2005, BATA approved another forward contract to swap variable-to-fixed rate bonds with a notional amount of \$1 billion. The effective forward swap date on this contract is November 1, 2007. Counterparties to the transactions are Ambac for \$420 million, JP Morgan for \$270 million, Citibank for \$260 million and Bank of America for \$50 million. During the 40 year term, BATA will pay each respective counterparty based on a

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

fixed rate ranging from 3.63 percent to 4.00 percent. In exchange, BATA will receive a variable rate based on ranging percentages of LIBOR.

BATA will receive from Ambac and Bank of America a variable rate payment based on 68 percent of the one-month LIBOR rate. BATA will receive from Citibank a variable-rate payment based on 53.80 percent of the one-month LIBOR rate and 74 basis points. BATA will receive from JP Morgan a variable-rate payment based on 69.33 percent of the five year LIBOR rate in years 1 through 30 (first leg) and a variable-rate payment based on 75.08 percent of the one-month LIBOR in years 31 through 39 (second leg).

Five hundred million dollars of the variable-rate bonds associated with this \$1 billion dollar swap were issued in May 2007. The remaining \$500 million of the variable-rate bonds associated with this swap will be issued prior to November 1, 2007.

BATA entered into these transactions as a means of lowering long-term debt costs while maintaining a hedge against increases in short-term rates. BATA is aware that swap transactions contain certain associated risks not traditionally associated with fixed-rate issues, particularly the risk of counterparty failure. However, BATA has structured the transaction with reasonable safeguards, including downgrade and collateral provisions required of all counterparties, insurance guaranteeing performance on the Ambac components, as well as BATA's unilateral ability to cancel any transaction with 15 days notice.

The swap contracts address credit risk by requiring the counterparties to post collateral if two triggering mechanisms are breached: counterparty credit ratings fall below "A+" or "Aa3" from Standard & Poor's and Moody's respectively; and the swap carries a positive fair value in excess of \$10 million.

As of June 30, 2007, counterparties posted a combined \$49 million in collateral with a third party safekeeping agent. Details of the collateral are included on Schedules 14-17.

As of June 30, 2007, the swap counterparties carried the following ratings:

	<u>Standard &amp; Poor's</u>	<u>Moody's</u>
Ambac	AAA	Aaa
JP Morgan AAA ISDA	AAA	Aaa
Citigroup/Citibank	AA/AA+	Aa1/Aaa
Bank of America	AA+	Aaa
Morgan Stanley	A+	Aa3

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

Cancellation of any or all of the swap transactions is subject to a market value calculation at the time of termination. The market value calculation is used to determine what, if any, termination payment is due from or to the counterparty. At June 30, 2007, the financial and investment advisory firm of Public Financial Management (PFM) established the termination value as of June 30, 2007 as follows:

<u>Notional Value</u>	<u>Counterparty</u>	<u>Fixed Rate</u>	<u>Value due from / (to) counterparty</u>
\$ 75 million	Ambac	4.110%	\$ (3,104,673)
\$ 75 million	Ambac	4.120%	(3,533,873)
\$ 75 million	Morgan Stanley	4.090%	(3,607,255)
\$ 75 million	Citigroup	4.100%	(3,709,124)
\$ 200 million	Ambac	4.139%	(9,365,179)
\$ 300 million	Ambac	3.416%	7,132,936
\$500 million	Ambac	3.647%	19,138,946
\$30 million	Bank of America	3.633%	1,208,989
\$225 million	Citibank	3.638%	6,768,880
\$245 million	JP Morgan Chase	4.000%	10,049,928
* \$420 million	Ambac	3.641%	16,524,028
* \$50 million	Bank of America	3.626%	2,076,729
* \$260 million	Citibank	3.636%	7,912,337
* \$270 million	JP Morgan Chase	4.000%	11,505,683
			<u>\$ 58,998,352</u>

\* Five hundred million dollars of the variable-rate bonds associated with this \$1 billion swap were issued in May 2007. The remaining \$500 million of the variable-rate bonds associated with this swap will be issued prior to November 1, 2007.

The termination value, or fair value, BATA would receive from terminating all swaps is \$59 million on June 30, 2007.

BATA's intent, however, is to maintain the swap transactions for the life of the financing. In accordance with Governmental Accounting Standards Board Statement No. 20, BATA has not adopted Financial Accounting Standards Board Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and has not recorded the termination value due to or from the counterparties.

The schedule that follows shows the total interest cost of the swap payments. The total cost is determined by taking the fixed rate payment to the counterparty, netting the variable rate payment received from the counterparty, plus any associated administrative costs associated with the swap and variable rate obligation.

**Arbitrage**

IRS Code Section 148 requires interest earned on the proceeds of a tax-exempt bond issuance that exceed the arbitrage yield on the bonds be rebated back to the IRS. BATA incurred a calculated rebate arbitrage liability of \$233,922 for the fiscal 2007 year that is being held in a restricted account with the trustee for potential future payment to the IRS.

**6. LEASES**

**Capital Leases**

The MTC leases copier equipment under capital leases expiring in MTC's fiscal year end 2011. The assets and liabilities under this capital lease are recorded at the present value of the minimum lease payments. Minimum future lease payments under the capital lease are comprised of the following:

<u>Governmental Activities</u> <u>Year Ending June 30</u>	<u>Amount</u>
2008	\$ 42,735
2009	42,736
2010	42,736
2011	<u>10,684</u>
Total	138,891
Less interest amounts	<u>(20,422)</u>
Present value of net minimum lease payments	<u><u>\$ 118,469</u></u>

**7. INTERFUND RECEIVABLES, PAYABLES AND TRANSFERS**

The composition of interfund transfers as of June 30, 2007, is as follows:

<b>Transfer Out:</b>	<b>Transfer In:</b>				
	AB 664 Net		Capital Projects	Other	
	General	Reserve		Toll Revenue	Governmental Funds

Total	\$ 12,251,035	\$ 11,636,478	\$ 1,755,544	\$ 10,336,611	\$ 35,979,668

**Due to/from other funds**

Receivable Fund	Payable Fund	Amount
General	BATA	\$ 290,905
General	STA	\$ 148,627
Capital Projects	Exchange	\$ 106,308
SAFE	General	\$ 1,510,276

Transfers are used to move revenues from the fund with collection authority to the program fund that accounts for the various grant programs based on both budgetary and matching fund requirements.

Outstanding receivables and payables between funds are due to timing differences resulting from when expenditures are incurred and reimbursement payments are made.

**8. EMPLOYEES' RETIREMENT PLAN**

**Plan Description**

MTC's single employer defined benefit pension plan, the Miscellaneous Plan of Metropolitan Transportation Commission ("the Plan"), provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries.

The Plan is part of the Public Agency portion of the California Public Employees' Retirement System (CalPERS), an agent multiple-employer plan administered by CalPERS, which acts as a common investment and administrative agent for participating public employers within the State of California. A menu of benefit provisions as well as other requirements are established by state statutes within the Public Employees' Retirement Law. The MTC selects optional benefit provisions from the benefit menu by contract with CalPERS and adopts those benefits through local ordinance. CalPERS issues a separate comprehensive annual financial report. Copies of the CalPERS annual

# **Metropolitan Transportation Commission**

## **Financial Statements for the years ended June 30, 2007 and 2006**

### **Notes to Financial Statements**

---

financial report may be obtained from the CalPERS Executive Office, 400 P Street, Sacramento, California 95814.

#### **Funding Policy**

Members in the Plan are required to contribute a percent of their annual covered salary, which is established by California state statute. MTC is also required to contribute the actuarially determined remaining amounts necessary to fund the benefits for its employees. The actuarial methods and assumptions are those adopted and amended by the CalPERS Board of Administration. Pursuant to an election by MTC employees, a contract amendment was executed with PERS in fiscal 2007, amending the retirement benefit formula from 2% at 55 to 2 ½ % at 55. MTC employees agreed to contribute the full cost of this enhancement and share in future retirement cost increases. The full cost of MTC's retirement benefit is allocated as follows:

- MTC pays the Base Rate of 17.395% in effect on July 1, 2006 (10.395% employer contribution and 7% employee share, per employee's gross earnings), and the FY 2007-08 Base Rate. The Base Rate will increase effective FY 2008-09 by a percentage equivalent to the actual increase in cost attributable to the BATA employees hired in FY 2005-06.
- Members pay 3.402% of eligible gross earnings (2.402% employer contribution and 1.00% employee contribution) to cover the full cost of the enhancement.
- MTC and members will share equally in payment for additional PERS increases, up to 2% above the Base Rate and the 3.402% enhancement cost, each paying up to an additional 1%.
- Per MOU agreement, any PERS contribution rate increases exceeding the additional 2% referenced above, will result in re-opening the MOU to determine further cost-sharing arrangements.

#### **Annual Pension Cost**

The required contribution for the year ended June 30, 2007 was \$2,647,617 determined as part of the June 30, 2005 actuarial valuation using the entry age actuarial cost method with the contributions determined as a percent of payroll. The actuarial assumptions included (a) 7.75 percent investment rate of return (net of administrative expenses) and (b) projected salary increases that vary by duration of service. Both (a) and (b) include an inflation component of 3.0 percent and an annual production growth of .25%. The actuarial value of the Plan's asset was determined using a technique that smoothes the effect of short-term volatility in market value of investments over a fifteen-year period depending on the size of investment gains and/or losses.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

The following table shows the MTC's required contributions and the percentage contributed for the current year and each of the two preceding years:

<u>Fiscal Year Ended</u>	<u>Annual Pension Cost (APC)</u>	<u>Percentage of APC Contributed</u>
6/30/2005	\$ 1,190,870	100%
6/30/2006	\$ 2,324,948	100%
6/30/2007	\$ 2,647,617	100%

The MTC's funding progress information as of June 30, 2005 is illustrated as follows:

<u>Actuarial Valuation Date</u>	<u>Actuarial Value of Assets (a)</u>	<u>Actuarial Liability (AAL) Entry Age (b)</u>	<u>Unfunded AAL (UAAL) (b-a)</u>	<u>Funded Ratio (a/b)</u>	<u>Covered Payroll (c)</u>	<u>UAAL as a Percentage of Covered Payroll ((b-a)/c)</u>
June 30, 2003	\$ 43,680,162	\$ 44,901,919	\$ 1,221,757	97.3%	\$ 11,177,301	10.9%
June 30, 2004	45,753,197	48,662,374	\$ 2,909,177	94.0%	11,714,647	24.8%
June 30, 2005	49,691,002	55,528,976	\$ 5,837,974	89.5%	11,623,784	50.2%

The latest available actuarial valuation was as of June 30, 2005 showing an under-funded status.

**9. POSTEMPLOYMENT HEALTHCARE BENEFITS**

**Plan Description**

MTC's defined benefit postemployment healthcare plan provides medical benefits to eligible retired employees and their eligible dependents. MTC maintains the same medical plans for its retirees as for its active employees, with the general exception that once a retiree becomes eligible for Medicare, he or she must join a Medicare HMO or a Medicare Supplement plan, with Medicare becoming the primary payer. Employees become eligible to retire and receive healthcare benefits upon reaching the age of 50 with 5 years of service to MTC. Benefits are paid for the lifetime of the retiree, spouse or surviving spouse, and dependents up to the age of 23.

MTC is a contracting agency under the Public Employees' Medical and Hospital Care Act (PEMHCA), which is administered by the California Public Employees' Retirement System (CalPERS) for provision of healthcare insurance programs for both active and retired employees.

**Funding Policy**

MTC contributions are based on the annual required contribution (ARC) of the employer, an amount actuarially determined in accordance with the parameters of GASB Statement No. 45, *Accounting and Financial Reporting of Post Employment Benefits Other Than Benefits*. The ARC represents a level of funding that, if paid on an ongoing basis, is

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. MTC's payments of monthly retiree premiums of \$353,378 were applied toward the required annual employer contribution of \$2,155,931.

**Annual OPEB Cost**

MTC's annual Other Postemployment Benefit (OPEB) expense is based on the annual required contribution (ARC) of the employer less healthcare costs paid on behalf of its retirees. The following table represents annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the net OPEB obligation. This is the first year of implementation of the new GASB standard:

<u>Fiscal Year Ended</u>	<u>Annual OPEB Cost</u>	<u>Percentage of Annual OPEB Cost Contributed</u>	<u>Net OPEB Obligation</u>
6/30/2007	\$ 1,802,553	100%	\$ -

**Funded Status and Funding Progress**

The funded status of the plan as of July 1, 2006 was as follows:

Actuarial accrued liability (AAL)	\$ 14,376,476
Actual value of plan assets	-
Unfunded actuarial accrued liability (UAAL)	<u>\$ 14,376,476</u>
Funded ratio (actuarial value of plan assets/AAL)	0.00%
Covered payroll (active plan members)	\$ 15,193,161
UAAL as a percentage of covered payroll	94.62%

Actuarial valuations must make certain assumptions regarding the probability of occurrence of certain events such as employment turnover, retirement, and mortality, as well as economic assumptions regarding future healthcare costs and interest rates. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress on Table IV, presented as required supplementary information following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

**Actuarial Methods and Assumptions**

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided as the time of each valuation and the historical pattern of sharing of

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

benefit costs between the employer and plan members. The actuarial methods and assumptions used include techniques designed to reduce effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with long-term perspective of the calculations.

In the July 1, 2006 actuarial valuation, the projected unit credit cost method was used. The actuarial assumptions included a discount rate of 6.0%, a return on assets of 5.0%, and an annual healthcare cost trend rate of 10% initially, reduced 1% annually to a rate of 5 % after 5 years based on the average employer premiums as of the valuation date.

The MTC's funding progress information as of June 30, 2007 is illustrated as follows:

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b-a)/c)
7/1/06	\$ -	\$ 14,376,476	\$ 14,376,476	0.0%	\$ 15,193,161	94.6%

**10. COMMITMENTS AND CONTINGENCIES**

MTC's administered projects are subject to audit by the respective grantors. The final determination of allowable project costs can be made only after the grantor's audits are completed and final rulings by the grantor's administrative departments are obtained. Disallowed expenditures, if any, must be borne by nonfederal funds. In the opinion of MTC's management, such disallowances, if any, would not have a material adverse effect on the accompanying government-wide financial statements.

MTC is involved in various claims and litigation that is considered normal to the MTC's regional planning activities. MTC has established a \$2.1 million reserve for such contingencies. In the opinion of the MTC's management, the ultimate resolution of these matters will not have a material adverse effect on the MTC's government-wide financial position.

**Commitment and Loan to Bay Area Rapid Transit District**

On March 11, 1999, MTC, the San Mateo County Transit District (SamTrans) and the Bay Area Rapid Transit District (BART) (collectively the Parties) entered into a Memorandum of Understanding (MOU) defining the terms and conditions by which additional funds would be made available for the SFO Extension Project (the Project). On September 1, 1999, the Parties agreed to provide a total of \$198.5 million to the Project, with BART providing \$50 million, SamTrans providing \$72 million, and MTC providing \$76.5 million.

The MTC's commitment included a \$60 million loan (the Loan) for the Project's cash flow requirements and \$16.5 million for additional budget items. In addition, MTC agreed to pay for interest and financing costs not to exceed \$11.8 million, for a total commitment of \$88.3 million.

**Metropolitan Transportation Commission**  
**Financial Statements for the years ended June 30, 2007 and 2006**  
**Notes to Financial Statements**

---

To fund the Loan, MTC agreed to advance \$60 million from the East Bay Rail Extension Reserve Account (the East Bay Account) for Project cash flows. Under the MOU, BART was to repay this advance without interest, upon authorization and receipt of federal funds anticipated pursuant to BART's full funding grant agreement with the U.S. Department of Transportation (the FTA grant). MTC further agreed to allocate \$16.5 million to BART from the West Bay Rail Extension Reserve Account (the West Bay Account) for budget items, and utilize a combination of bridge toll revenues and other sources to pay interest and financing costs up to \$11.8 million.

On September 1, 1999, the San Francisco Bay Area Transit Financing Authority (the Authority), a joint powers agency, created pursuant to a joint exercise of powers agreement between BART and MTC, issued \$65,650,000 in Bridge Toll Notes (the Notes). The Notes were paid in full and the outstanding bonds were retired in February 2007. Financial statements of the Authority can be obtained from BART, 300 Lakeside Drive, Oakland, California 94604.

On February 12, 2001, MTC and BART executed an Acknowledgement Agreement (the Agreement) which modified the repayment terms of the Loan. Under the Agreement, MTC acknowledged that the FTA grant proceeds, originally pledged to repay the Loan, will be pledged and assigned in favor of bonds (the Bonds) issued by the Association of Bay Area Governments to refinance the Notes and finance the Project. The Agreement confirms BART's obligation to repay the Loan, as set forth in the MOU; however, such repayment will be made from the general resources of BART and subject to the prior pledge in favor of the Bonds.

On June 28, 2006, MTC and BART revised the terms of the \$60 million loan agreement. The new agreement extends the \$60 million loan to June 30, 2015 with an interest rate of 3%. The amount of principal payments received is \$13 million as of June 30, 2007.

For the year ended June 30, 2007, the total loan outstanding with BART is \$47 million.

<b>Fiscal Year</b>	<b>Principal Payments</b>
2008	\$ 5,000,000
2009	5,000,000
2010	8,000,000
2011	8,000,000
2012	8,000,000
2013	8,000,000
2014	5,000,000
	<u>\$ 47,000,000</u>

**Metropolitan Transportation Commission**

**Notes to Financial Statements**

---

**11. RISK MANAGEMENT**

MTC is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; and natural disasters. MTC purchases commercial insurance through an insurance agent, who obtains the appropriate insurance coverage needed by the MTC from insurance companies. To date, there have been no significant reductions in any of the MTC's insurance coverage, and no settlement amounts have exceeded commercial insurance coverage for the past three years.

**12. EXTRAORDINARY ITEM – AB 144 IMPACT OF CONSOLIDATION OF BRIDGE TOLL REVENUE**

On July 16, 2005, the California State Legislature approved Assembly Bill (AB) 144, which transferred toll administration responsibility from Caltrans to BATA. This transfer of responsibility includes:

- Consolidation of all toll revenue dollars, including the state seismic toll dollar for the seven bridges, under BATA administration.
- Creation of a new Caltrans, California Transportation Commission, and BATA Toll Bridge Project Oversight Board.
- Unlimited project-level toll-setting authority to complete the Seismic Retrofit Program and BATA's responsibilities under the "Act."

Caltrans had bonds outstanding issued by the California Infrastructure and Economic Development Bank (Ibank) which were backed by the revenue from the seismic toll dollar. The seismic toll dollar was set aside for completion of projects under the Seismic Retrofit Programs. Before the state owned seismic toll dollar could be transferred over to BATA, these bonds had to be defeased. This defeasance was considered an extraordinary item in fiscal year 2006. BATA issued bonds in April 2006 to handle this. Most of the bond proceeds were paid to Deutsche Bank National Trust Company to act as escrow agent for the defeasance of the Ibank bonds. These proceeds will be invested and will be used to pay the principal and interest of the Ibank bonds as they become due. With the payment of \$1,119,562,683 to the escrow agent, BATA now owns all the bridge toll revenue from all the State owned Bay Area bridges.

In addition, BATA approved a financing plan of \$6.2 billion in September 2005 to fund the new seismic retrofit and other bridge toll projects.

(1) Amended on 6/1/06 from 75.08% one month LIBOR; swap mode is in 2 legs; converts back to 75.08% one month LIBOR on 4/1/2041

(2) Unilateral collateral posting by CP

(3) Collateral posted by cp under terms and conditions of JP Morgan AAA ISDA; \$0 threshold regardless of ratings

(4) Unilateral termination at BATA's discretion upon financing and delivery of \$1 billion bonds

(5) Forward swap executed in 2005 with an effective trade date of 11/1/07

# STATISTICAL SECTION

This part of the MTC’s comprehensive annual financial report presents detailed information to aid in understanding information contained in the financial statements, note disclosures, and required supplementary information.

<b>Contents</b>	<b>Page</b>
-----------------	-------------

<b>Financial Trends</b>	<b>102</b>
-------------------------	------------

These schedules provide trend information to assist the reader in understanding the change in MTC’s financial performance over time.

<b>Revenue Capacity</b>	<b>107</b>
-------------------------	------------

These schedules include information to help the reader assess MTC’s most significant local revenue source, Toll Bridge Revenue.

<b>Debt Capacity</b>	<b>112</b>
----------------------	------------

These schedules provide information to help the reader assess the affordability of MTC’s current levels of outstanding debt and it’s ability to issue additional debt in the future.

<b>Demographic and Economic Information</b>	<b>114</b>
---	------------

These schedules offer demographic and economic indicators to help the reader understand the environment in which MTC’s financial activities take place.

<b>Operating Information</b>	<b>116</b>
------------------------------	------------

These schedules contain service and infrastructure data to help the reader understand how the information in MTC’s financial report relates to the services provided and the activities performed.
